SUPERINTENDENT'S REPORT.

To the Honorable Board of Administration:

GENTLEMEN—The thirty-second biennial report of the superintendent of this institution is respectfully submitted. This report covers a period of two years, ending June 30, 1910.

The hospital, during much of this time, has been greatly overcrowded and, while the patients have been made comfortable, this condition has interfered to some extent with proper classification.

At the close of the last biennial report there were present 1,474 patients. The number present at the close of the last period was 1,471.

The number of patients admitted during the past two years was 687; the number readmitted, 199; the number of patients returned while on parole, 138; the total number of admissions for the two years being 1,024.

Of those admitted 412 were males and 275 females; of those readmitted 118 were males and 81 females.

Of those admitted 622 were county patients, while 264 were private patients.

The whole number under treatment for this period was 2,333.

Of those discharged 142 were discharged as "cured," 333 as "improved" while 226 died and 5 escaped.

The number transferred to other institutions and deported was as follows: Peoria State Hospital, 112; Lincoln State School and Colony, 6; Kankakee State Hospital, 2; Chester State Hospital, 2; deported, 2.

HEALTH.

Patients have been especially free from contagious diseases of a serious nature.

In January, 1910, there were three cases of parotitis or mumps; two of these cases were among employés, while one was a patient.

In February, 1910, a male patient, who was received from Madison county, developed smallpox, after being in the hospital about ten days. On account of the rather obscure manifestation, the disease was not promptly recognized. After the usual time following exposure, the disease appeared in three other male patients. All were removed to the

isolation hospital and, by the free use of vaccine, we were successful in preventing the spread of the disease. It was of a mild type and all made prompt recoveries.

During the months of April, May and June, 1910, there were a number of cases of measles, ten in all; eight of these were patients and two employés. All recovered.

More has been attempted in the line of surgery during the past two years than at any previous time.

IMPROVEMENTS MADE.

The tubercular hospital, for which an appropriation of \$6,000.00 was made, has been completed and occupied. This building affords accommodation for twenty-four patients, twelve of each sex.

Twenty-five thousand dollars was appropriated for building male hospital wing and remodeling an old building to be used for female hospital; this latter has been completed and is ready for occupancy. This is a two story building, one floor of which will be used for the care of the physically sick, while the other floor will be used for giving special attention to acute cases and will be of great assistance to our receiving service.

The male hospital building is incomplete, on account of lack of funds. The original plan for the construction of this building contemplated the construction of a two story building to correspond with the female wing, but, afterwards, a three story building was decided upon; also, that it be of fire-proof construction. These changes added so materially to the cost that the appropriation was exhausted before the building could be completed. The building can be made ready to occupy within sixty days, at a small expense.

Fifty thousand dollars was appropriated by the last General Assembly for a new building to be used for living quarters for employés, especially nurses and attendants. The contract for the erection of this building was awarded to Joseph De Goveia of this city and it is now being constructed.

Fifteen thousand dollars was appropriated for improving bathing and closet facilities. This is being expended for this purpose.

Six thousand dollars was appropriated for remodeling and enlarging dining-rooms at the main building; this work is well under way.

Five thousand dollars was appropriated for building a new greenhouse. Plans have been drawn and arrangements made for enlarging this building.

The three wards of the north wing damaged by fire last December have been overhauled, the roof and much of the woodwork of the upper floor renewed, and all the wards newly painted.

One thousand five hundred dollars was appropriated for improvement of grounds; this has been expended for curbing drives, draining, grading lawn, laying concrete walks and planting trees.

Interior view of Tubercular Hospital.

ORDINARY APPROPRIATIONS NEEDED.

Ordinary expenses for year, beginning July 1, 1911, for 1,600 inmates, based upon a net per capita cost of \$155.00	\$248,000 00
Ordinary expenses for year, beginning July 1, 1912, for 1,675 inmates, based upon a net per capita cost of \$155.00	259,625 00
Ordinary expenses for year, beginning July 1, 1911, for 1,600 inmates, based upon a gross per capita cost of \$164.38	263,008 00
Ordinary expenses for year, beginning July 1, 1912, for 1,675 inmates, based upon a gross per capita cost of \$164.38	275,336 50
Ordinary repairs and improvements, per annum	30,000 00
Improvement of grounds, per annum	2,000 00

EXTRAORDINARY REPAIRS AND IMPROVEMENTS.

Five thousand five hundred dollars will be required the first year for painting and \$2,000.00 the second year. Of the \$5,500.00 asked for the first year, \$3,500.00 will be needed for painting the main building, the south side requiring two coats.

Two thousand five hundred dollars per annum is asked for plumbing.

Three thousand dollars is asked for the purchase of crushed rock from the penitentiary for the drives about the front grounds.

Ten thousand dollars will be required to rewire center building and place electric wires in iron conduits. Our recent fire emphasizes the importance of placing all hidden electric wires in iron conduits, especially those in the attics, also those running between the floors and ceilings.

Fifty thousand dollars is asked to construct quarters for male employés.

Four thousand dollars is asked to complete male hospital wing.

Thirty-five thousand dollars is asked to build new kitchen at main building and extend building now occupied by kitchen and amusement hall. This hall has a seating capacity for about 400 patients, which is entirely too small for our use and many patients are deprived of attending entertainments on this account. The present kitchen is on the first floor under the amusement hall; it is dark, with low ceiling, insufficient in size and inconveniently arranged. If an appropriation is made for the construction of a new kitchen it is proposed to extend the present building, thus enlarging the amusement hall and using the room now occupied by the kitchen for shops of various kinds, where patients can be employed in different ways, and at the same time be properly supervised. The hospital is in urgent need of something of this kind, as nothing in the past has been provided. To be able to manufacture some of the things that we use will result in a saving and will give our patients employment, which is fully as important.

One thousand five hundred dollars is asked for the purchase of new iron beds. We still have a number of old wooden beds; to enable us to discard these and replace with iron ones this amount is asked.

Two thousand dollars is asked for enlarging and remodeling bakery. The room now used for this purpose is entirely too small for our present needs; the capacity of the institution has been more than doubled since this building was constructed.

This institution has not over fifty acres of farm land, not including the land now used for garden purposes. A farm of 160 or 200 acres could be used to great advantage. Such land, conveniently located for our purpose, would cost in the neighborhood of \$200.00 per acre.

The crowded condition of all the institutions of the State points to the necessity of providing more accommodations. The institution has plenty of land, well adapted for building purposes, and I would suggest that this hospital be enlarged. The plan I propose is to build detached buildings, two stories in height, connected by corridors at each end of the annex, in the form of a square, with a dining-room in the center, capable of seating 300 patients. One hundred thousand dollars is asked for building two such buildings, with dining-rooms, each building to accommodate 100 patients. This plan will not only increase the capacity of the institution but will provide better accommodations for a class of feeble and untidy patients than we can give them under the present arrangement. This plan could be carried out without the necessity of enlarging our power or electric light plants, and the present kitchens at the annex are large enough and would be conveniently located for supplying the food.

Your attention is called to the hospital's water supply. For a number of years this has been obtained from the city. On two occasions, during the last eight years, this source of supply has been exhausted and, had it not been for our reservoirs, our condition would have been precarious. The present source is unreliable and the quality of the water bad. With three institutions located in this city, it would seem wise that the State appropriate a sufficient amount to at least investigate and, if possible, obtain a reliable source of good water.

EMPLOYMENT AND AMUSEMENT.

During the two years just past the usual customary entertainments have been provided. Semi-weekly dances have been held during the winter months, on Tuesday evening at the main building amusement hall and on Friday evening in that of the annex amusement hall. Other amusements during the winter months have consisted of concerts, moving picture shows and vaudeville performances.

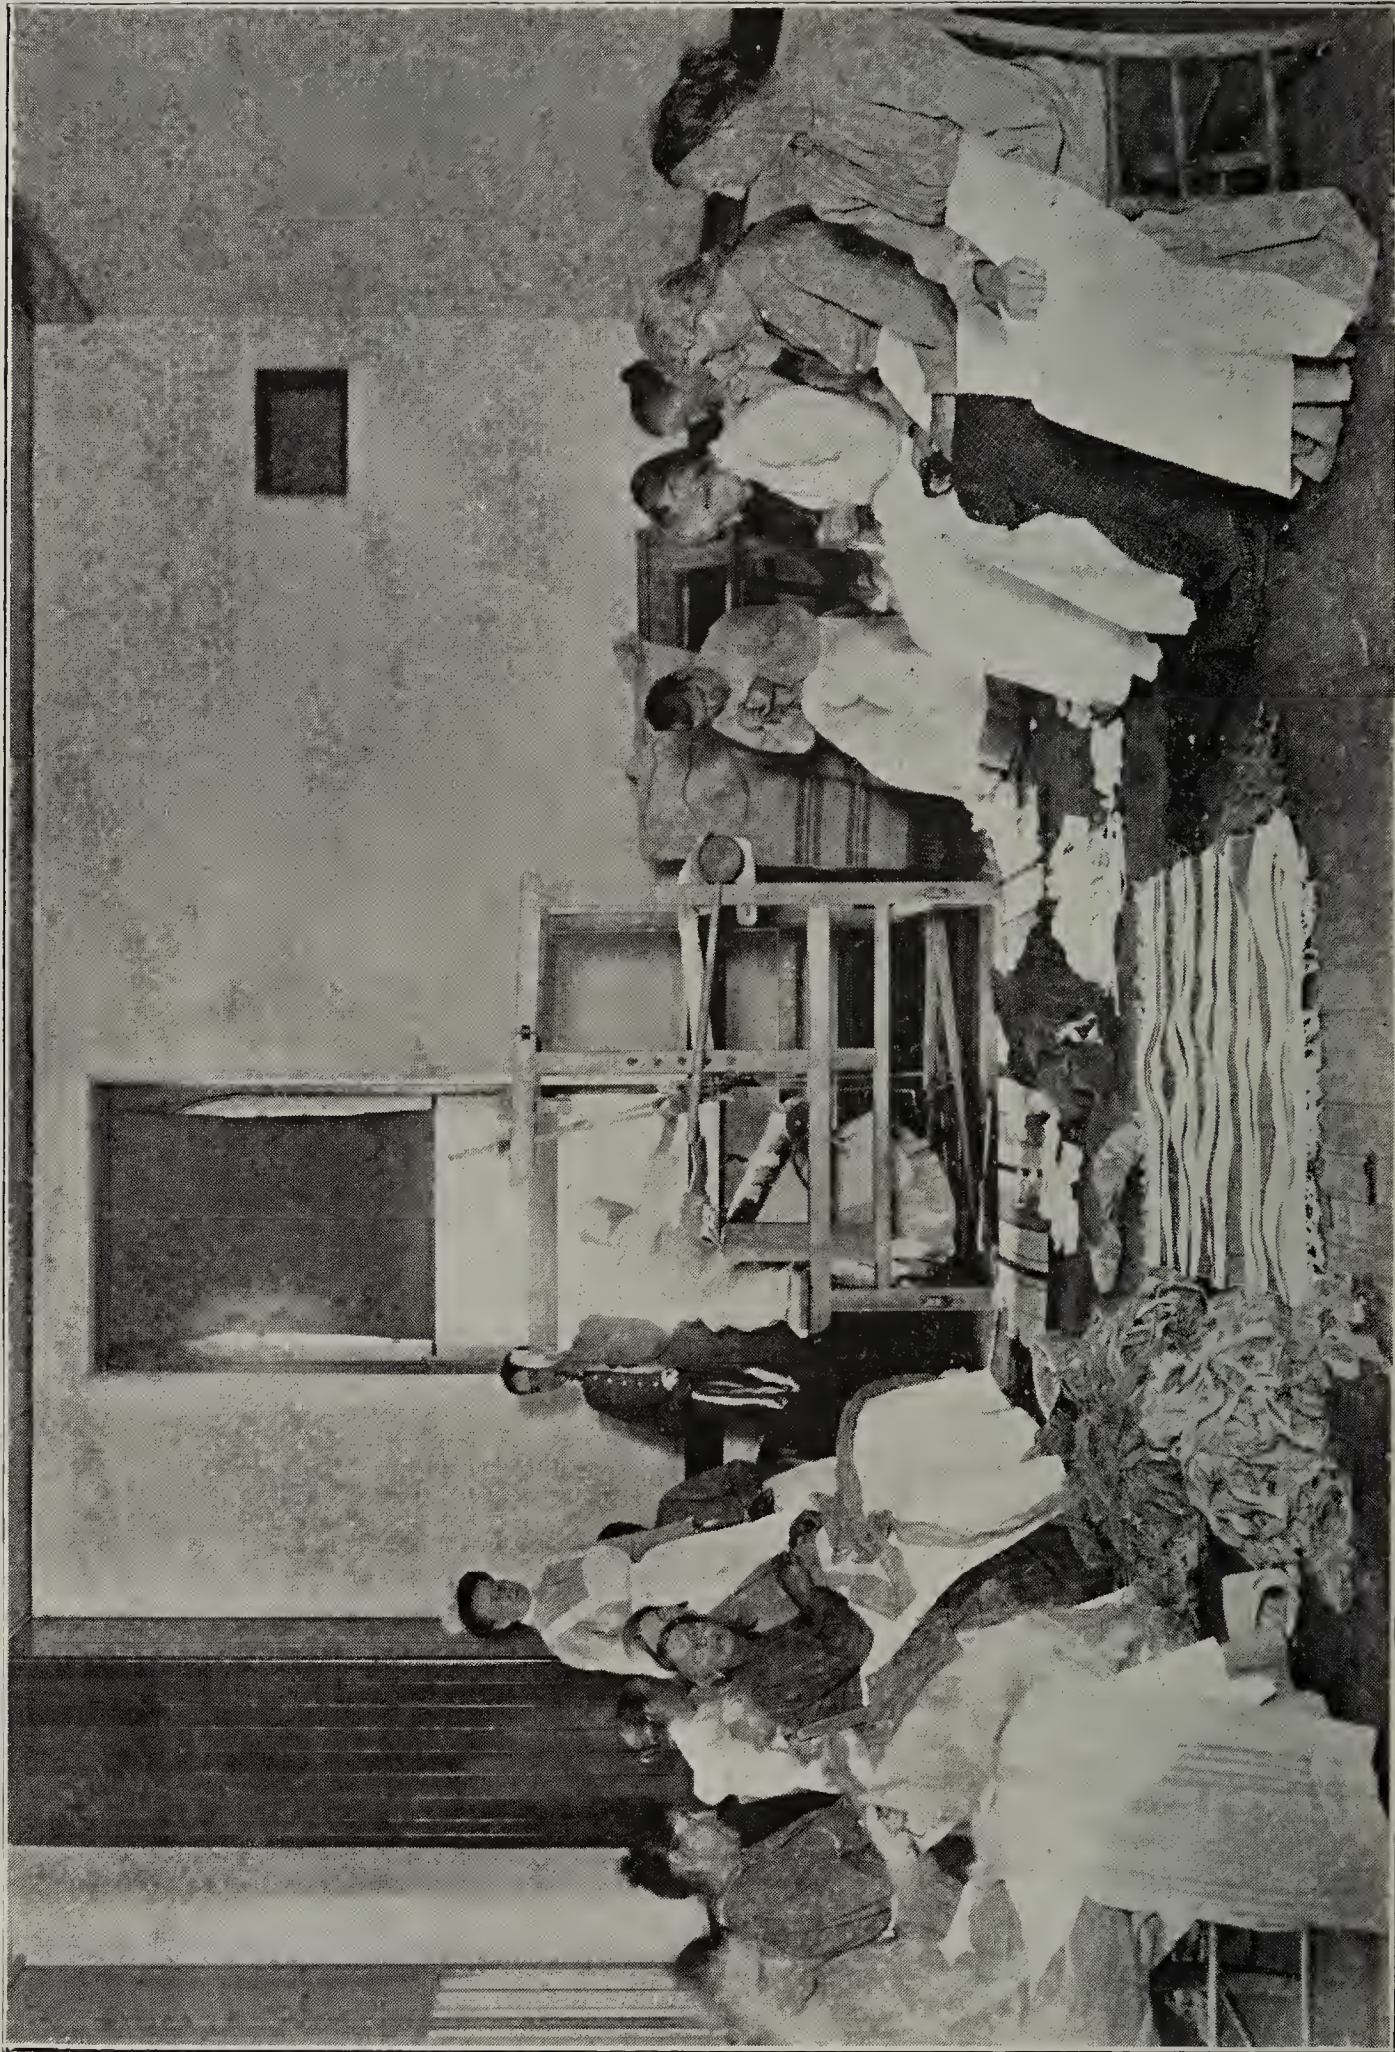

During the summer months there have been outdoor games, consisting of baseball, basketball, croquet and tennis. During the months of May, June, July and August, Jeffries' Band of this city has given concerts on the lawn of the institution on Sunday afternoons.

Chapel services have been held on Sunday afternoons during the winter months, with Catholic services in the morning.

Special effort has been made to provide employment for all classes of patients. To this end classes have been formed in needle and raffia work, with considerable benefit to a certain class of patients.

TRAINING SCHOOL.

The seventh year of our training school has just been completed; the course consists of two years, the first year being for instruction to attend-

Weaving Rugs.

ants, and it is compulsory. The instruction is in charge of the chief nurse, who is superintendent of the training school. Lectures are delivered by different members of the staff. The results obtained have been satisfactory.

MEDICAL STAFF.

Dr. George H. Stacy, pathologist, resigned his position to take up the practice of medicine in this city.

Dr. E. L. Crouch resigned his position as first assistant physician in July, 1909.

Dr. Frederick E. Munch was appointed assistant physician in July, 1909.

Dr. Thomas E. Charles, in July, 1909, was appointed as medical interne and resigned on Jan. 1, 1910, to accept a position as interne in St. Bernard's Hospital, Chicago.

Dr. Walter L. Treadway was appointed as medical interne in December, 1909, and in March, 1910, was promoted to the position of assistant physician.

Dr. Ralph T. Hinton succeeded Dr. Crouch in the position of first assistant physician and, in March, 1910, was promoted to the position of assistant superintendent.

Miss Adele S. Poston, chief nurse, resigned her position in March, 1910, to accept a similar position at the Kankakee State Hospital.

ACKNOWLEDGMENTS.

The institution is, again, indebted, to the publishers of papers of this hospital district who have been sending the institution their publications gratis. These papers are eagerly sought by our patients and are a source of great pleasure to them. A list of these publications may be found in another part of this report.

We are also indebted to Mrs. Mary Lampe of Bloomington who, on several occasions, has sent us several boxes of periodicals and magazines.

I wish here to acknowledge the efficient services rendered this institution by Dr. Carl E. Black of this city. During the past year, Dr. Black has given half a day each week, as was necessary, to the performing of surgical operations. His skill in this line is best attested by the uniformly successful results.

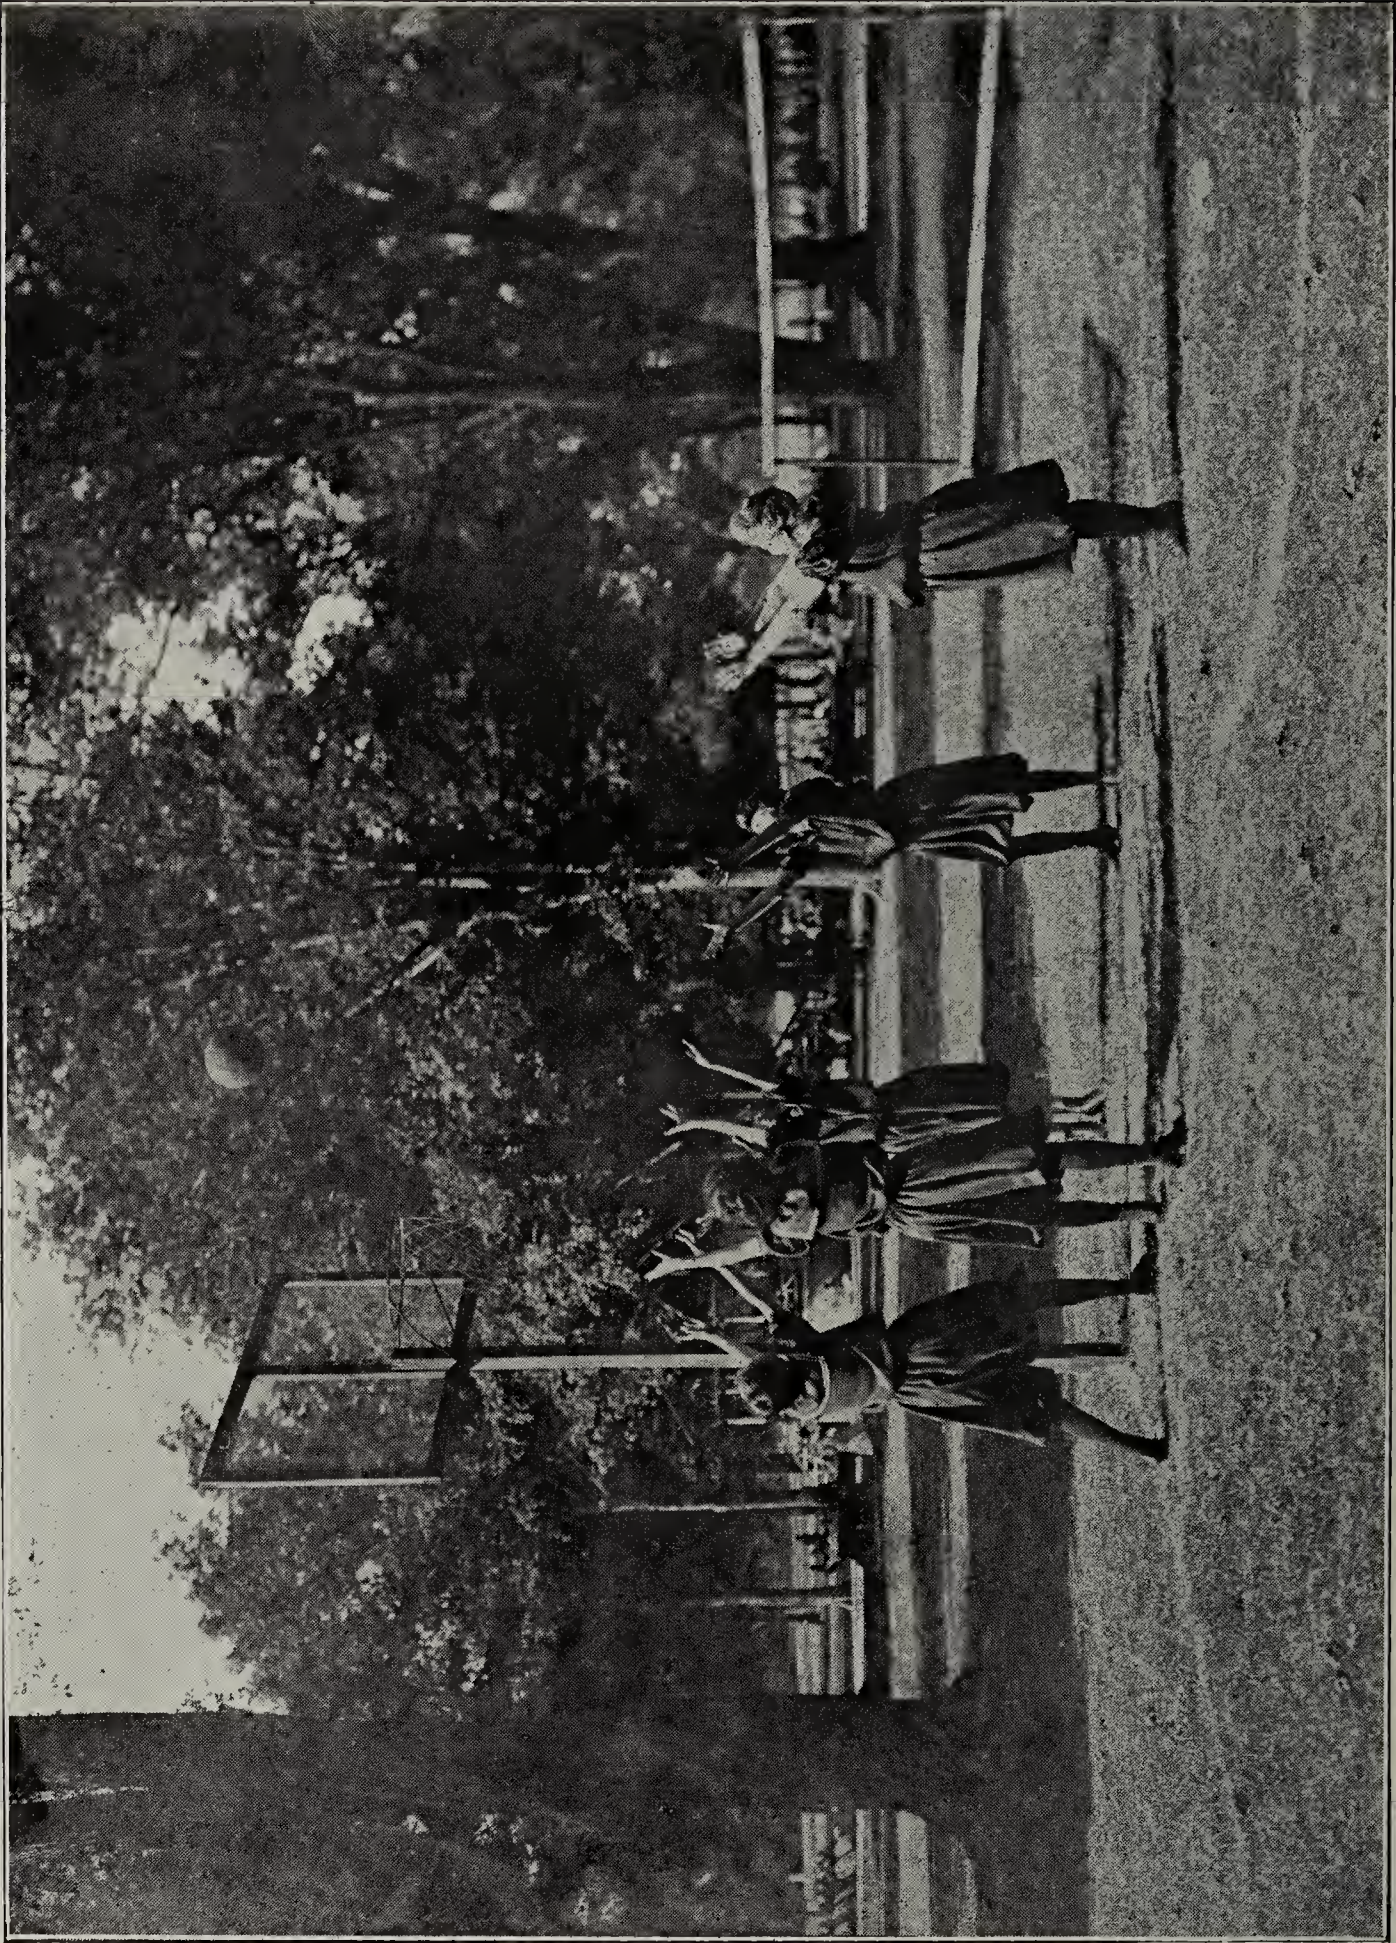

In concluding, I wish to thank the officers and employes for their support and the efficient service they have rendered.

H. B. CARRIEL,
Superintendent.

July 1, 1910.

Chief Clerk:

NEWTON DAVIS.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Administration:

GENTLEMEN—The thirty-third biennial report of the superintendent of this institution is herewith respectfully submitted.

The period covered by this report includes two years and three months; beginning with July 1, 1910, and ending September 30, 1912.

On June 30, 1910, or the close of the last biennial report, the number of patients present was 1,471. The number present September 30, 1912, was 1,621.

The number of patients admitted during the period covered by this report was 784; the number readmitted was 277; the number returned while on parole was 147; the total number of admissions for the two years, three months, was 1,208.

Of those admitted, 463 were males; 321 females; of those readmitted, 161 were males; 116 females.

Of the total number, 761 were admitted as county patients, while 300 were admitted as private patients.

The whole number under treatment for the period of this report is 2,532.

Of those patients discharged from the institution, 161 were discharged as "Cured;" 342 as "Improved;" 65 as "Unimproved;" 332 died and 1 escaped.

Of those transferred to other institutions or deported: 5 were transferred to the Peoria State Hospital; 1 to Elgin State Hospital; 1 to Chester State Hospital; 2 were deported. Eight patients were committed by order of the court for ten days' observation, pending judicial inquiry and were released without being regularly committed.

Two patients were found to be "Not Insane."

HEALTH.

The general health of the patients has been good. The hospital has been unusually free from acute diseases, or those of a contagious nature.

One case of diphtheria occurred in a male patient, who had been here over fifteen years. The man worked every day on the farm and had been on parole for eight or ten years. The attack was acute and severe, the patient succumbing to the disease in less than 48 hours. Precautions taken to prevent the spread of the disease were successful; no other cases occurring.

In 1911 a few scattered cases of measles occurred; also a few cases of facial erysipelas. Both diseases were of mild type. All made prompt recoveries.

IMPROVEMENTS MADE.

The male and female hospitals are both completed and have modern equipment, including apparatus for hydrotherapeutic treatment.

The greenhouse, which was in course of construction at the time of our last report, is completed. A cut of this building will be found on another page of this report.

Most of the toilet, wash and bathrooms at the Main building have been overhauled; terrazzo floors laid, and much of the plumbing renewed. At the North and South buildings, the toilet facilities have been increased and new bathtubs replace the old ones on all the wards.

The female nurses home is completed and occupied.

The home for male nurses is practically finished and will be occupied as soon as it can be furnished.

The last Legislature appropriated \$3,500.00 for painting the Main building. For this purpose concrete paint was used, and has proven entirely satisfactory and greatly improves the outward appearance of the building.

The \$1,500.00 appropriated for the purchase of iron beds has been expended for this purpose.

The \$2,000.00 appropriated for remodeling the bakery has been expended. The room has been almost doubled in size and a new terrazzo floor greatly adds to its appearance and cleanliness.

The appropriation of \$10,000.00 made for the purpose of rewiring buildings is being expended for this purpose as rapidly as it is practical to do the work. The more dangerous parts of the building are receiving attention first.

The \$1,500.00 appropriated for the improvement of grounds has been expended for paying florist's salary; building walks; extending the curb about the drives; purchasing trees, flowers and seeds.

ORDINARY APPROPRIATIONS NEEDED.

For the ordinary running expense of the institution for the next year, \$276,320.00 is asked.....	\$276,320 00
---	--------------

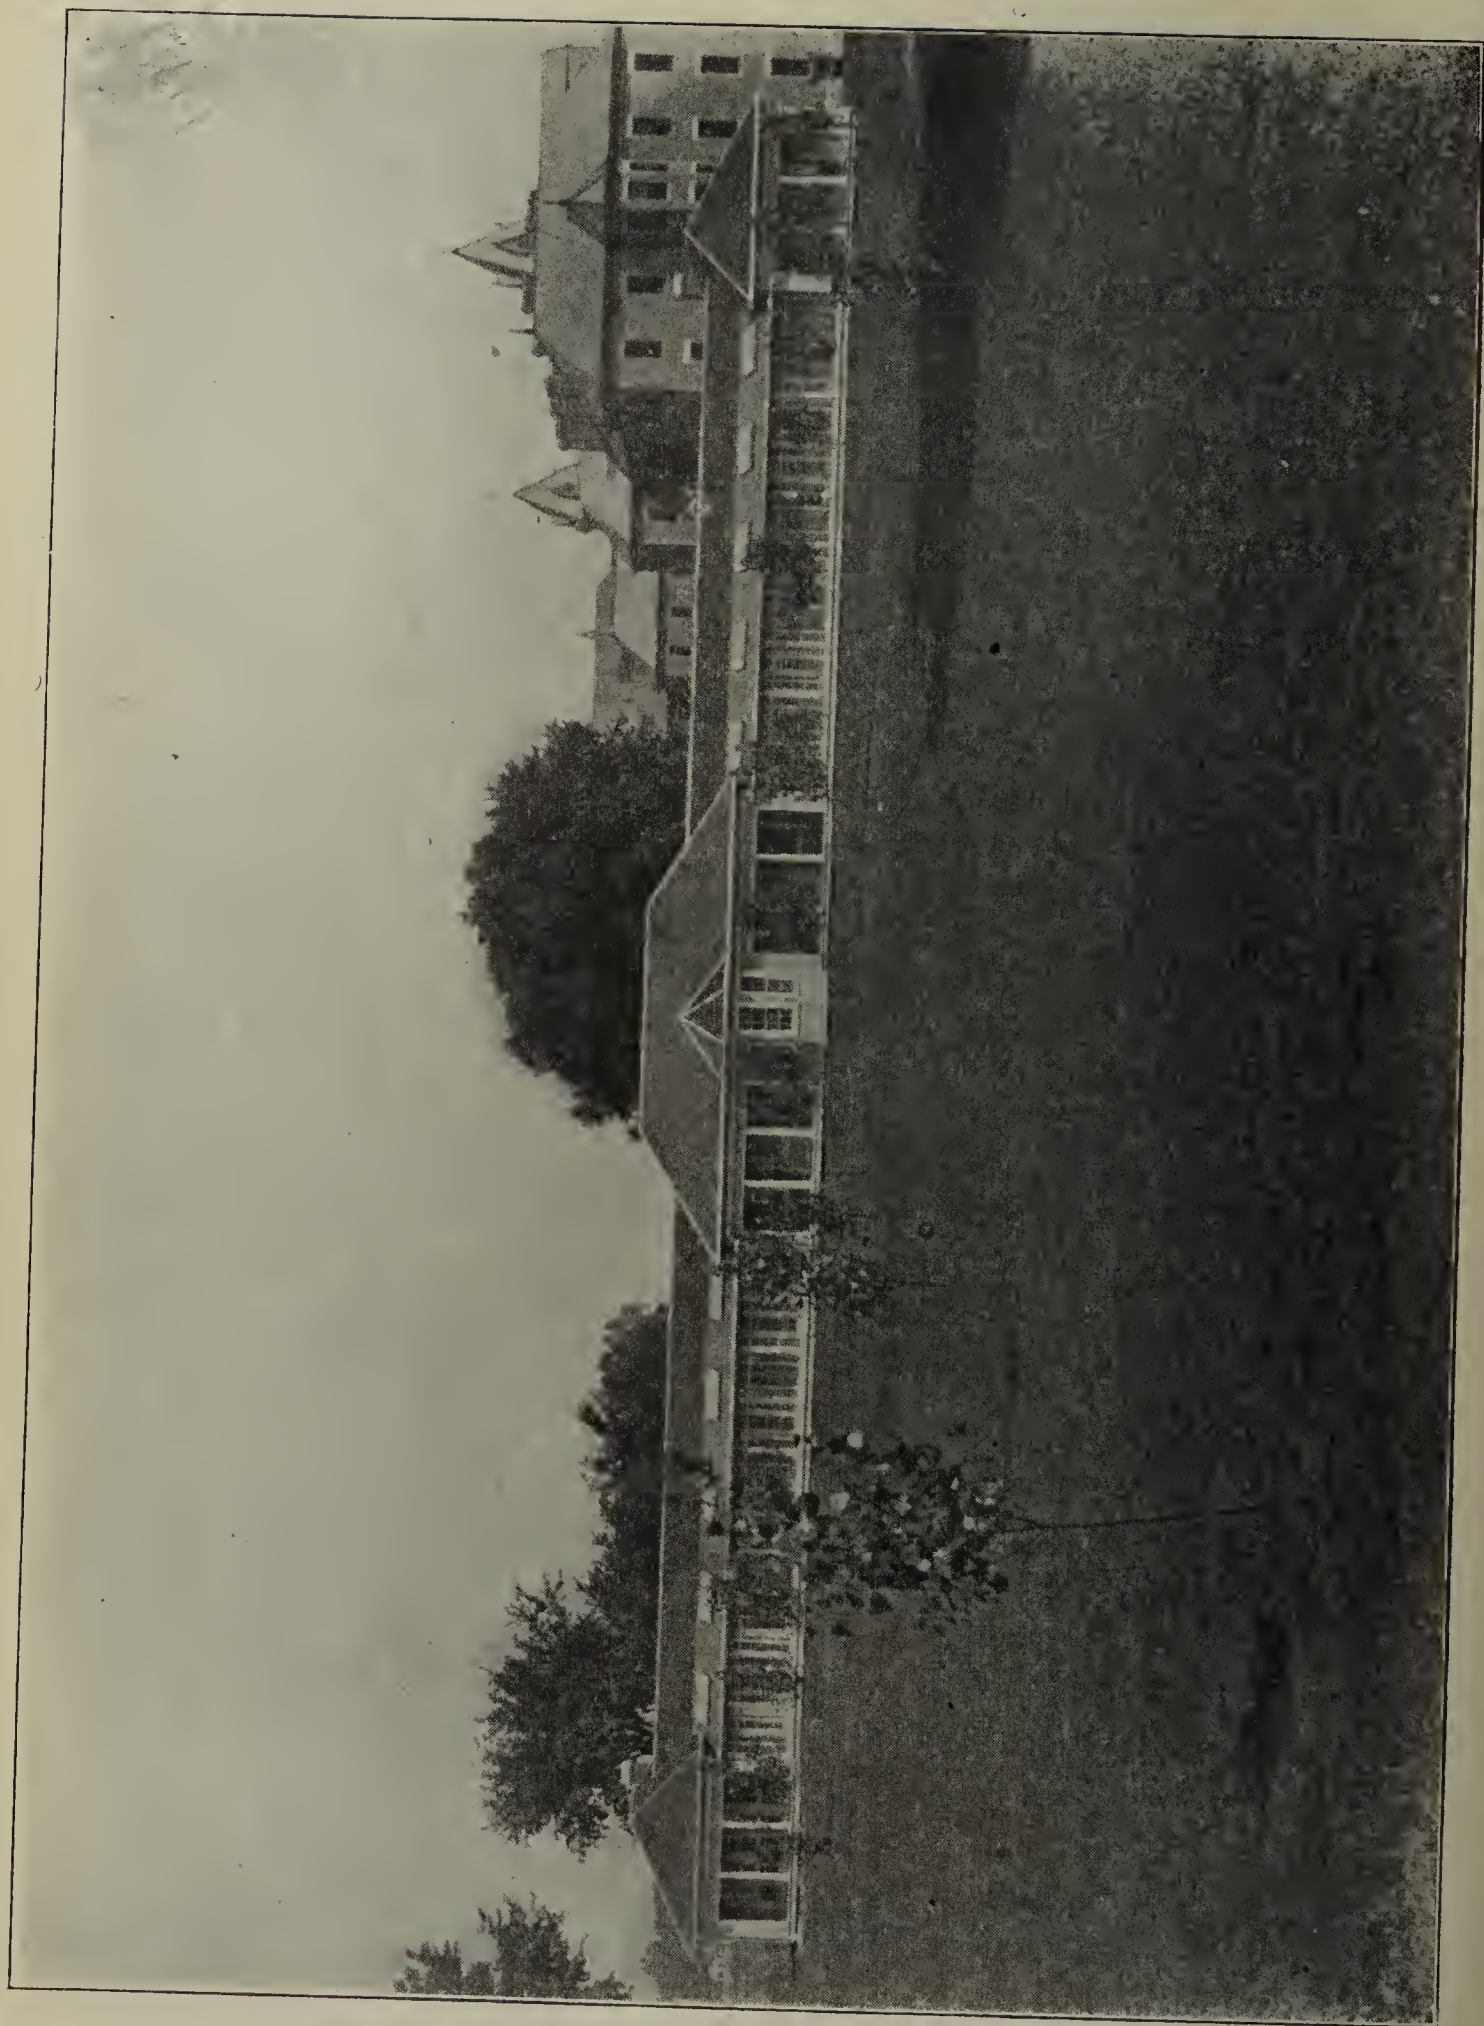

For the ordinary running expense of the institution for the second year, \$287,000.00 is asked.....	287,000 00
---	------------

This estimate is based upon the caring for 1,630 patients the first year, at a per capita cost of \$164.00.

For the second year, for caring for 1,750 patients, at a per capita cost of \$164.00.

It will be noticed that the per capita cost is considerably increased over that asked for last year. The explanation being that the per capita cost is now based upon the gross cost of maintenance, while that of two years ago was based upon the net cost.

Ordinary repairs and improvements, per annum.....	\$25,000 00
---	-------------

New Cottage for Tubercular Patients

EXTRAORDINARY REPAIRS AND IMPROVEMENTS.

In our last report, an appropriation for \$35,000.00 was asked for enlarging the Amusement Hall and building a new detached kitchen. On account of the large appropriations needed for other purposes it was thought best to delay the request for this appropriation until later.

For sometime we have felt the necessity of a larger amusement Hall at the Main building, as the present hall will accommodate about four hundred, making it necessary for a large number of patients to remain at home, who could otherwise attend entertainments.

The kitchen is now located just beneath the Amusement Hall. It is dark, has a low ceiling, is poorly ventilated and poorly arranged. It is proposed to build a detached kitchen, and extend the building now occupied by the Amusement Hall, thus increasing the capacity of the hall about 250.

The space now used as a kitchen it is proposed to convert into an Industrial Department for the making of brooms, shoe repairing, mattress making, rooms for the manufacture of rugs, for printing presses, etc. The institution has nothing of this kind at the present time, and this plan will provide a suitable place, at a very little cost. We have many patients who are skilled in the trades, who would be glad to avail themselves of the opportunity of employment in such a department. With an arrangement of this kind their work could be supervised by some one person, without being exposed to the danger of power machinery.

This plan provides for the extension of the food tunnels, through which food is distributed to the different portions of the building, not only to the new kitchen, but the laundry, just across the street. This arrangement will enable the delivery of laundered clothing to each ward, under cover. This will be a great improvement over the present plan of carrying baskets filled with clothes over ground and up several flights of stairs. The former request for \$35,000.00 for this purpose is renewed...

\$35,000 00

In cold weather the institution burns coal at the rate of about one car load a day. As the hospital has no track facilities it is necessary to haul this to the hospital by wagon. It is impossible to procure the coal, at all times, in just the quantities necessary for our use, so that a certain amount of storage room is required.

Our present coal house will not care for much more than one week's supply and we have been forced to throw the coal on the ground, where it is exposed to all kinds of weather, resulting in considerable loss by water and deterioration.

To enlarge our present brick coal house would entail considerable expense. It has been thought best to build a shed of wood construction, with concrete floors, of sufficient capacity to care for not less than one month's supply. For this purpose \$6,000.00 is asked.....

\$6,000 00

The appropriation of \$1,500.00 made by the Legislature for the improvement of grounds, after paying the salary of the florist, does not leave sufficient to be actually expended for work on the grounds.

I would recommend that the amount for this purpose be increased to, per annum.....

\$2,000 00

For many years the hospital has been using, for burying purposes, a lot in Diamond Grove Cemetery.

About a year ago this lot was filled. When negotiations with the city were opened, regarding a new lot, it was found there was no record, either at the institution or the city, that the

new Green House, Jacksonville State Hospital

ground already used had been paid for, and the city is now asking the institution to pay for the ground that has been thus used.

The dimensions of the lot are 166 feet long by 75 feet wide. At the usual charge of ten cents (10c) per square foot, this would amount to \$1,245.00. In view of the fact that there was no definite understanding with the State the city now offers to accept \$740.00 for it. This amount is asked for this purpose....

\$740 00

A new lot, contiguous to the old one, is 90 feet by 75 feet. At the usual price of fifteen cents (15c) per square foot, the cost of the lot would amount to \$1,012.50. The city offers to sell this lot to the State for \$1,000.00. This amount is asked for this purpose

\$1,000 00

It is estimated that the \$10,000.00 appropriated for rewiring buildings will not be quite enough to complete the work. An additional appropriation of \$1,500.00 is asked for this purpose...

\$1,500 00

The rule of your board, providing for an automatic increase of salaries, depending on the length of service of certain employes will cause expenditures, not otherwise provided for. To cover this increase, and to provide two assistants skilled in the use of hydrotherapy, \$2,500.00 per annum will be necessary. Per annum

\$2,500 00

The city of Jacksonville contemplates the renewing of the pavement of South Main street. The hospital has a frontage on this street of approximately one-half mile. The city agrees to pave this street, providing the institution will provide sufficient funds to pay for their portion of the pavement.

This street is in very bad condition and this improvement is urgently needed.

I would recommend that an appropriation be asked for this purpose and that it be provided that the large blocks be used instead of the ordinary size building brick.

The city's estimate of the hospital's portion of this expense amounts to \$8,936.81. This amount is asked for this purpose...

\$8,936 81

All the drives about the institution are made of cinders. A road of this construction is short-lived and requires almost constant repair. For constructing more durable driveways and with the view of improving the appearance of the grounds, it is proposed to substitute crushed rock, which can be obtained from the penitentiaries for the freight. For this purpose \$3,000.00 is asked.....

\$3,000 00

I would recommend that the daily hours of duty for the nurses and attendants be shortened. The day for this service now is twelve hours, and in many instances even longer than this.

In my opinion the hours are too long for this service to be attractive and the result is that there is considerable difficulty in obtaining desirable employes; those of mature years, who will remain in the service for any length of time.

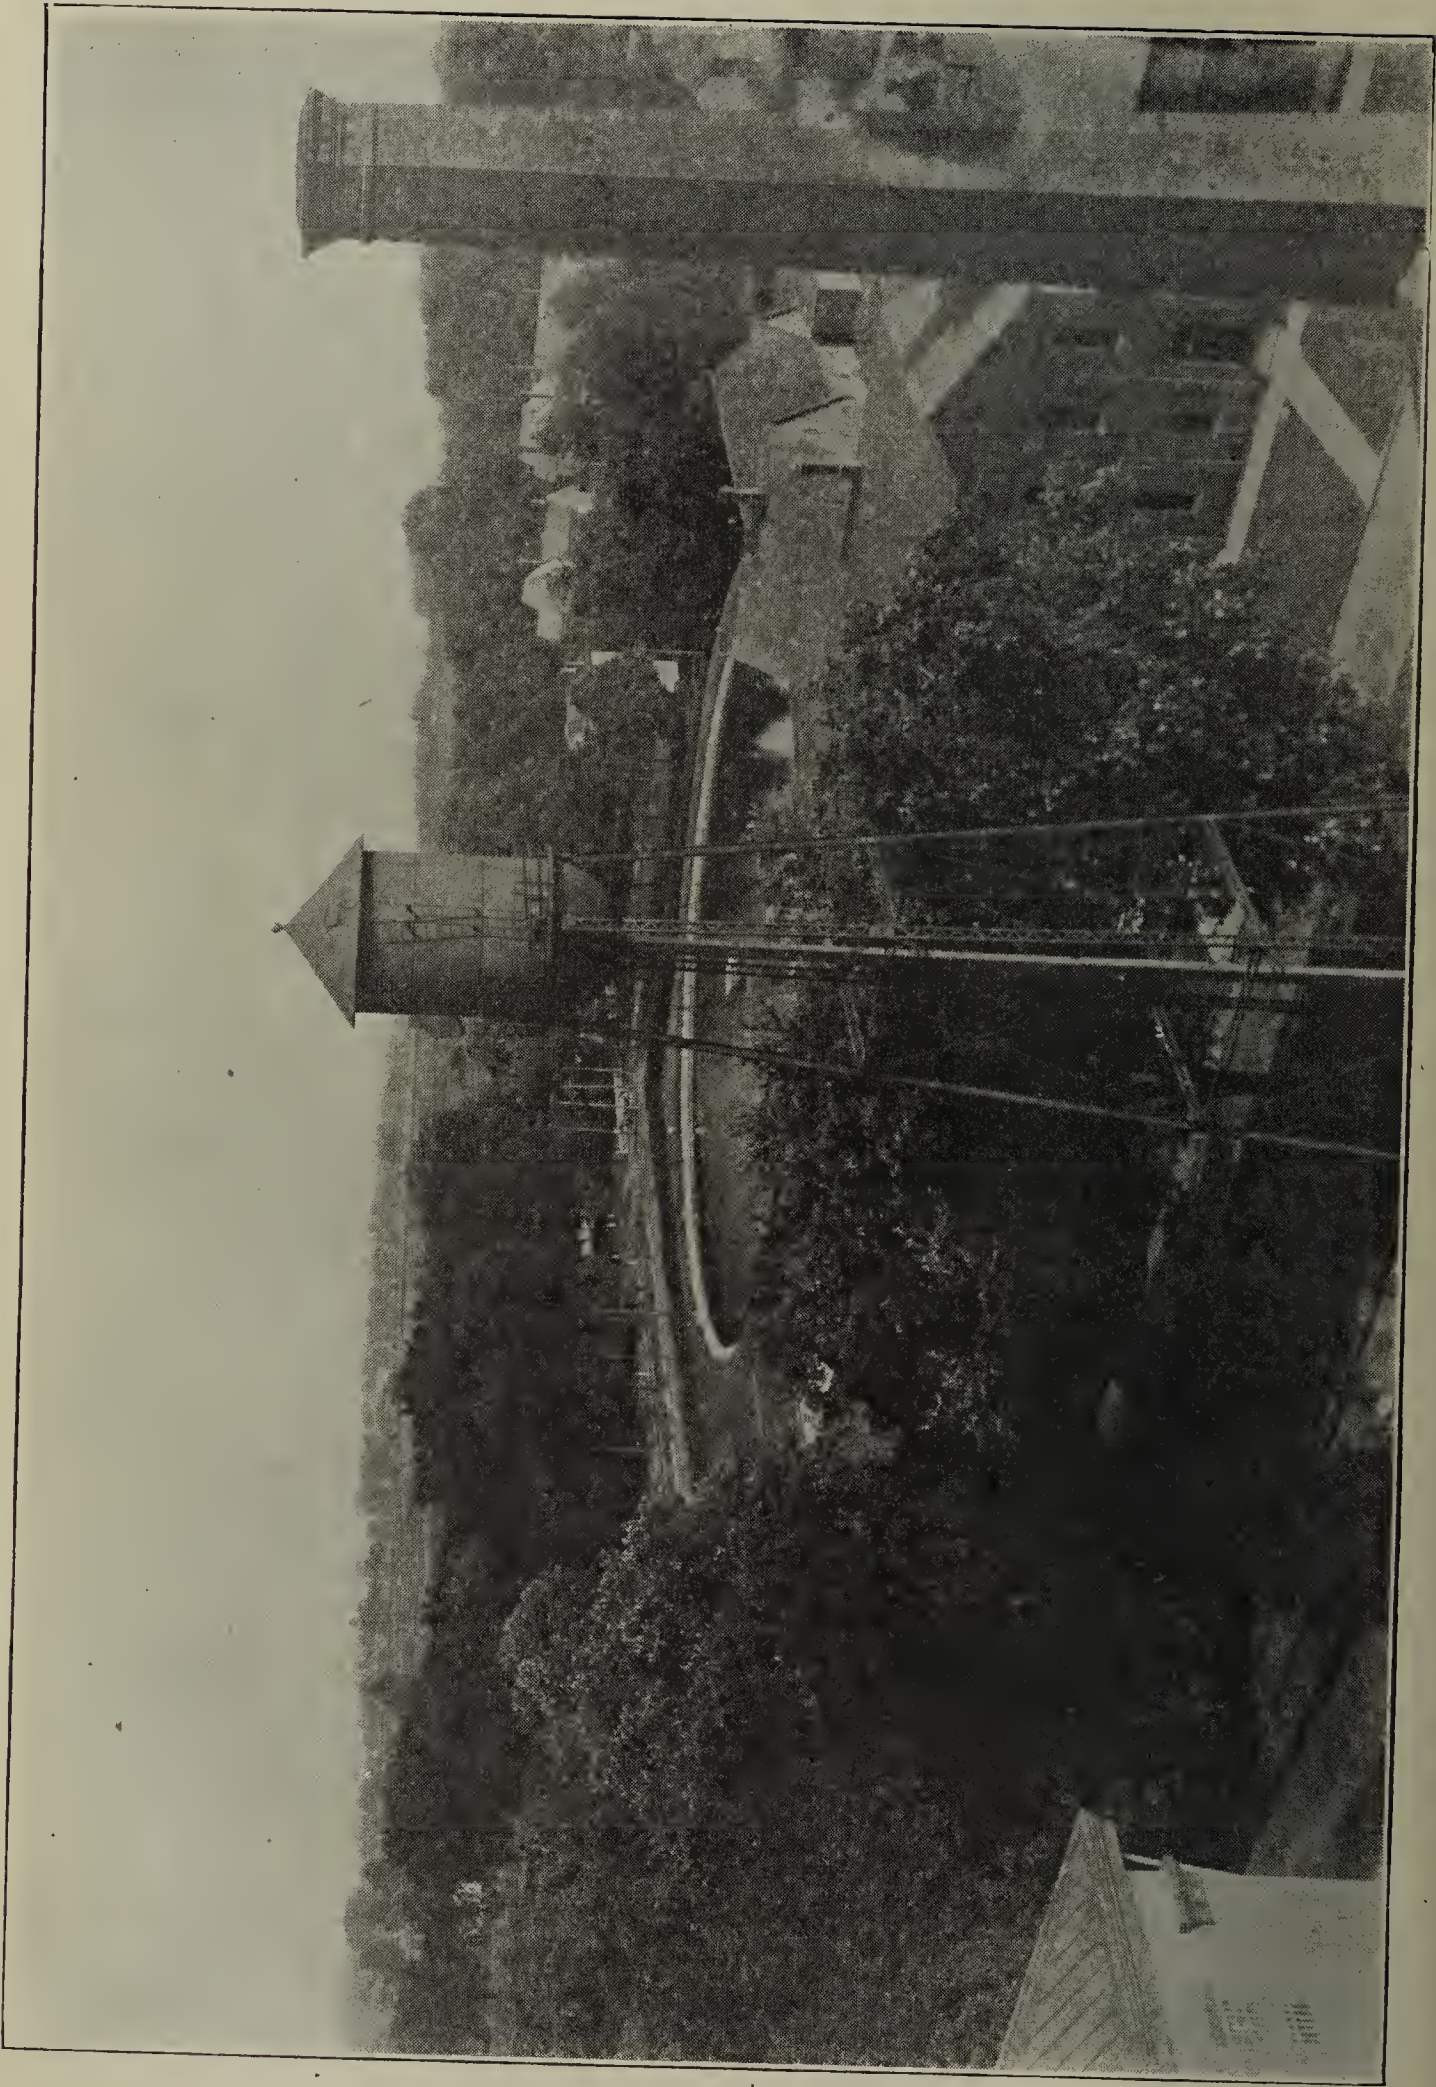

It is believed that with a maximum day of ten hours, this service will become more attractive and we will be able to obtain more mature and more stable employes.

This plan will necessitate an increase in our force at an estimated cost of about \$12,000.00 a year.....

\$12,000 00

AMUSEMENTS.

Every effort has been made to find suitable employment for patients. Nothing seems to afford them so much pleasure as the weekly dances. These dances are given twice a week; one evening in the Main building and another evening at the Annex.

Reservoir, Jacksonville State Hospital

The city does not afford very much in the way of theatrical or vaudeville performances. The hospital has to depend mostly on its employés for entertainment.

On several occasions entertainments of moving picture shows have been given, which have been very much enjoyed. The hospital contemplates the purchase of a moving picture machine as soon as arrangements can be made.

The principal out-of-door games and past-times are baseball, basketball, and tennis. During July and August Jeffries' Concert Band gives concerts on the lawn on Sunday afternoons.

During the winter months chapel services have been held regularly Sunday afternoons.

TRAINING SCHOOL.

Since 1903, this hospital has conducted a training school for employés, whose duties bring them in contact with patients; the object being to give them a better understanding and make them more proficient in their work.

The course that is being followed is that outlined by the Board of Administration. This outline may be found on another page of this report.

There are, at present, sixty-eight pupils enrolled; of these, ten are seniors, who are expected to graduate next June; ten are juniors and the other forty-eight members are of the preliminary classes.

CHANGES IN THE MEDICAL STAFF.

On November 1, 1911, Dr. Ralph T. Hinton, assistant superintendent, was appointed superintendent of the Elgin State Hospital.

Dr. Edward A. Foley, formerly assistant superintendent at the Anna State Hospital, was transferred to this institution to the position of assistant superintendent.

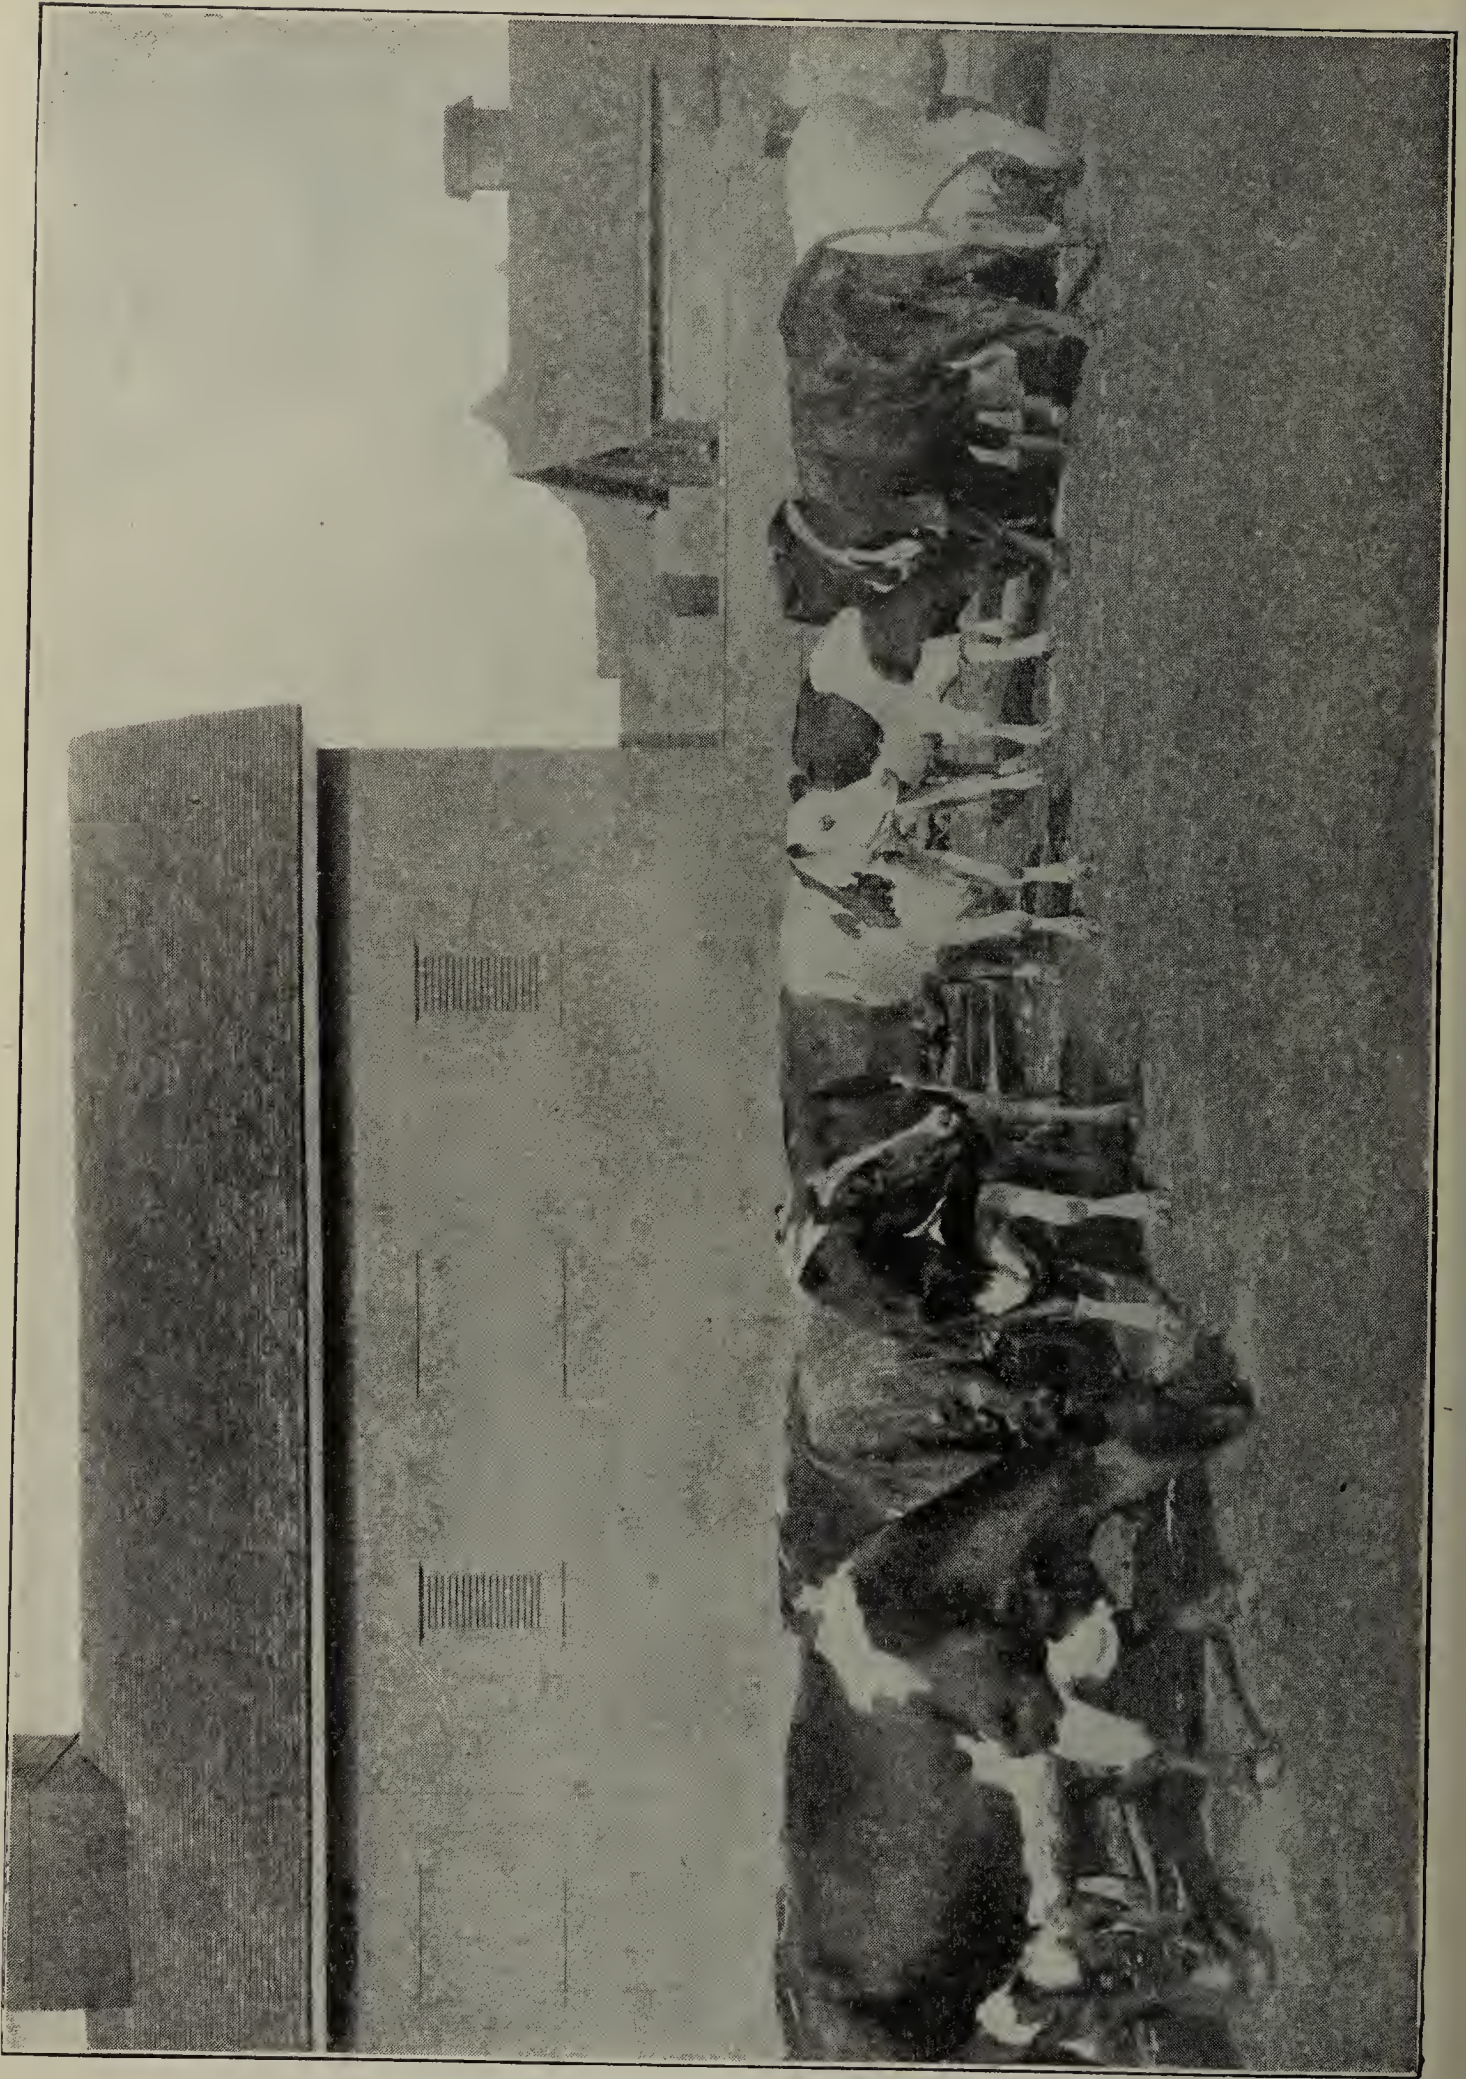

Dr. F. W. Nickel, assistant physician, resigned his position March 21, 1912, to enter private practice at Eureka, Ill.

On June 1, 1912, Dr. Elizabeth D. Carroll was appointed assistant physician, being transferred from the Peoria State Hospital. On September 8, 1912, Dr. Carroll was transferred to the Kankakee State Hospital to assume the same position there.

On September 25, 1912, Dr. Minerva Blair was appointed assistant physician and pathologist.

ACKNOWLEDGEMENTS.

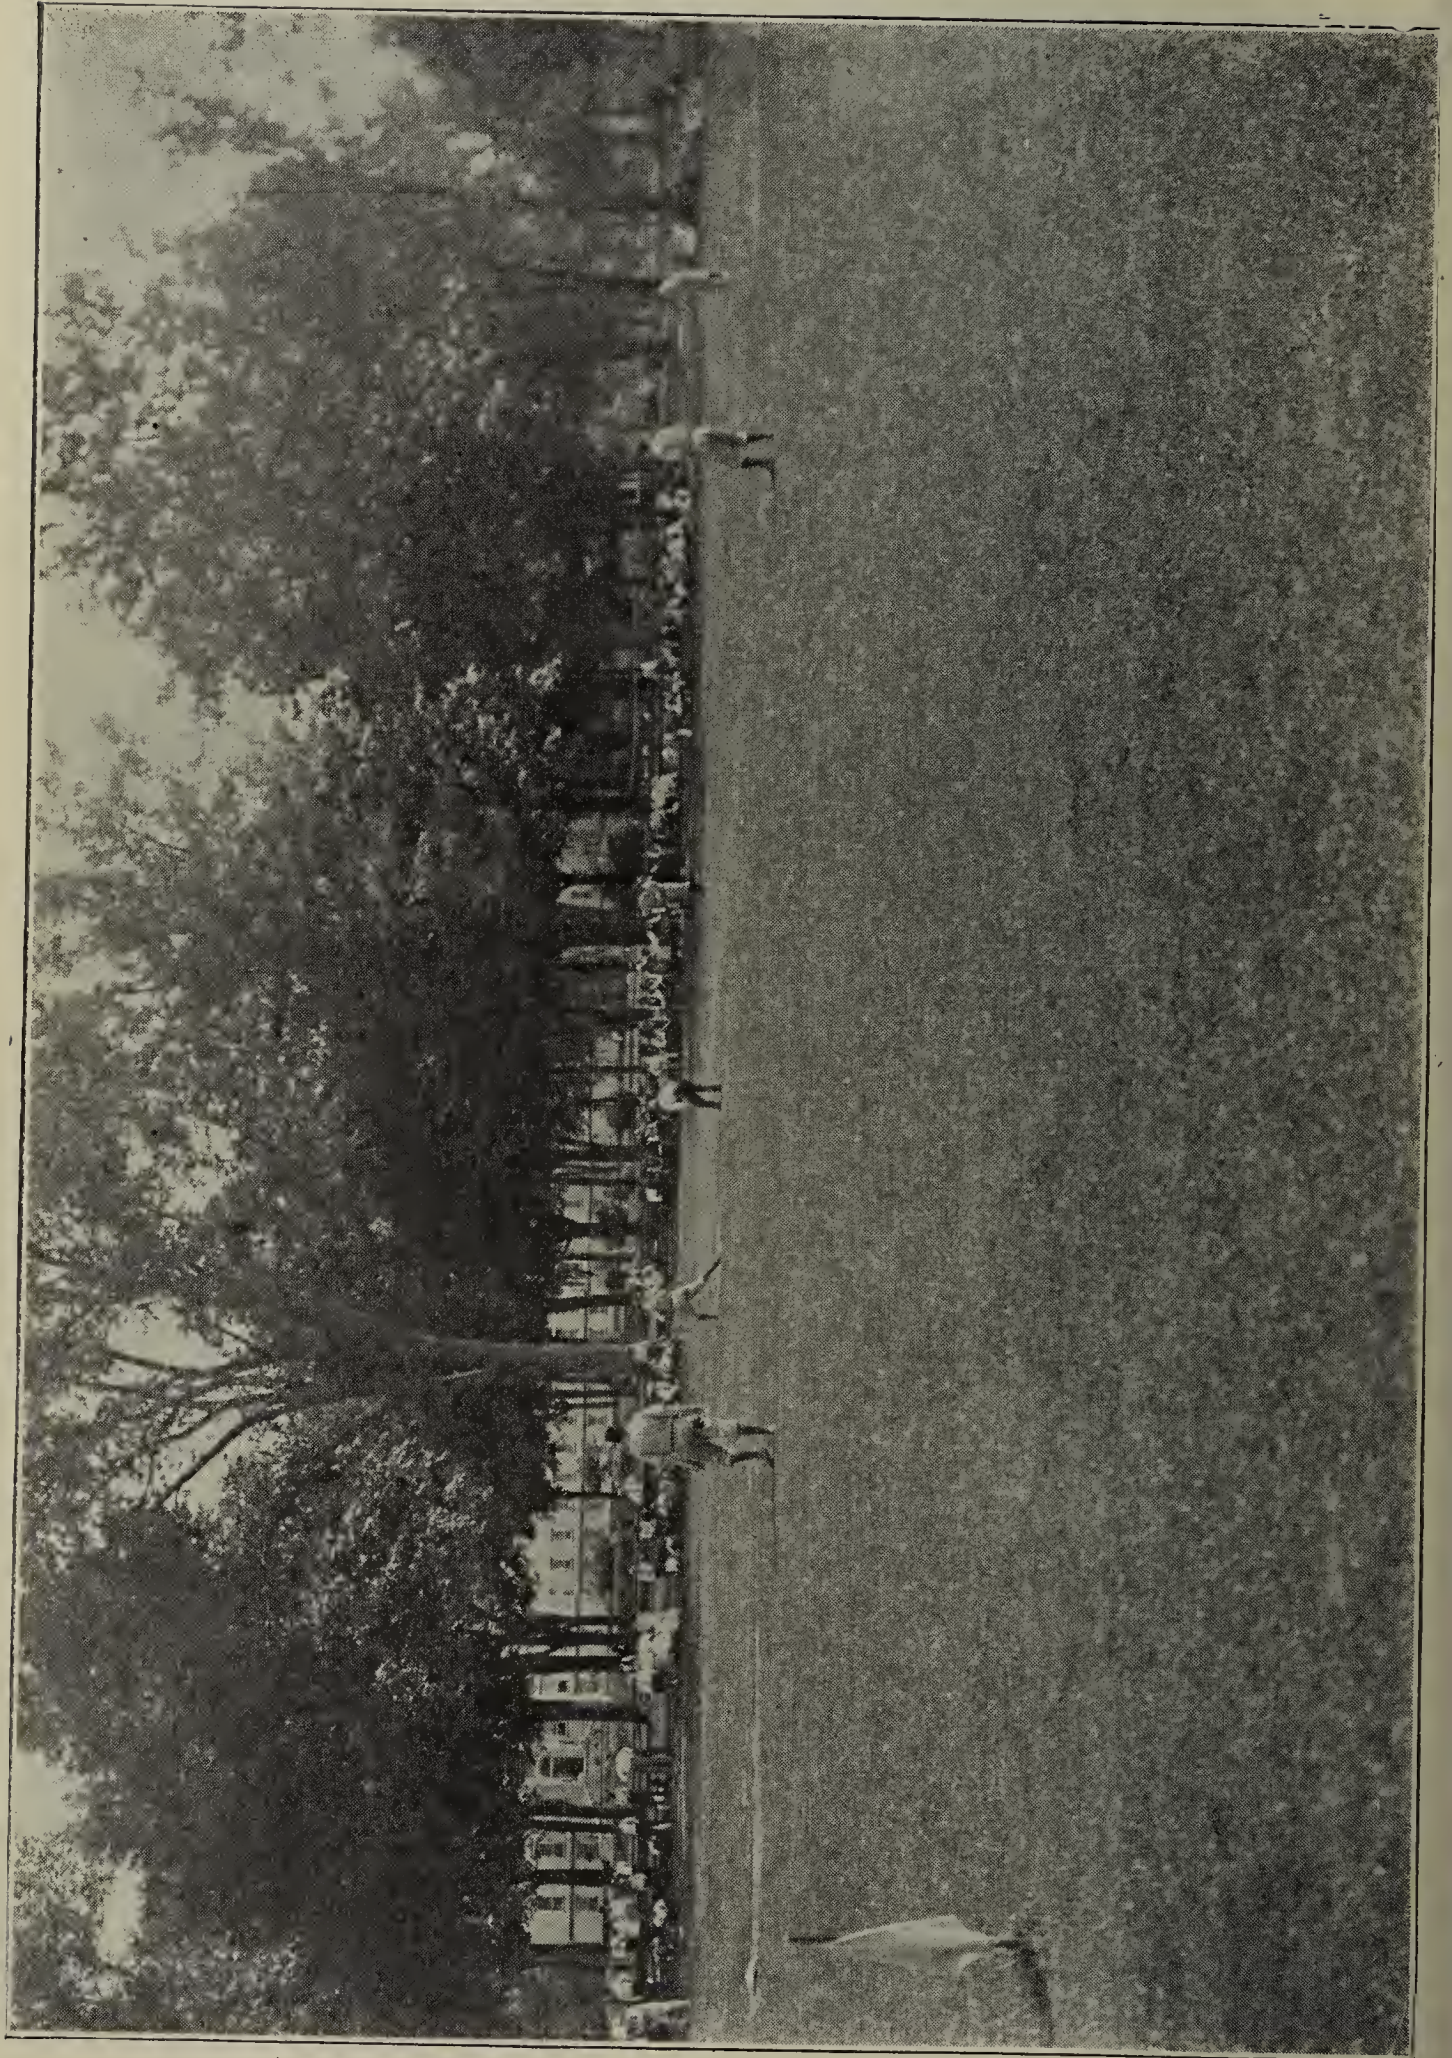

For several years the editors of papers in this hospital district have very kindly favored us with copies of their publications, gratis. Nothing gives the patients any more pleasure and satisfaction than to receive papers containing some word from home. I wish to assure the publishers of these papers that their kindness is very much appreciated.

I am greatly indebted to the officers and employés of the institution for their hearty coöperation and for the prompt and efficient manner in which they have performed their duties.

To the members of your Honorable Board, I am indebted for the confidence reposed in me, for your loyal support and for the many courtesies extended to myself and family.

H. B. CARRIEL,
Superintendent.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Administration.

GENTLEMEN: The thirty-fourth biennial report of the superintendent of this institution is herewith respectfully submitted.

The period covered by this report includes two years: beginning October 1, 1912, and ending September 30, 1914.

On October 1, 1912, or the close of the last biennial report, the number of patients present was 1,621. On September 30, 1914, or the close of the period covering this biennial report, the number of patients present was 1,704.

The number of patients admitted during the period covered by this report was 746; the number readmitted was 211; the number returned while on parole was 106; the total number of admissions for the two years was 1,063.

Of those admitted, 469 were males; 277 were females: of those re-admitted, 112 were males; 99 were females.

The whole number under treatment for the period of this report was 2,578.

Of those discharged from the institution, 88 were discharged as "Cured"; 368 as "Improved"; 31 as "Unimproved"; 321 died; escaped and dropped from the roll, 6; 10 were found to be "Not Insane."

Of those transferred to other institutions or deported: One male was transferred to the Anna State Hospital; 1 male to the Elgin State Hospital; 1 male to the Lincoln State School and Colony; 1 male to the Hospital for the Insane at Washington, D. C.; 1 female to the Watertown State Hospital; 1 female and 2 males to the Peoria State Hospital; deported, 1 male and 1 female.

HEALTH.

During the winter of 1912-1913 there was an epidemic of measles. The disease was limited to employees of the institution, about a dozen cases in all. By prompt isolation of these cases, and fumigation, the spread of the disease was promptly checked.

In December of 1913, there appeared in the institution a number of cases of streptococcus sore-throat, which was also limited to the employees.

In September, 1914, we had several cases of typhoid fever. The first case was that of a female employee. Four other cases were males, of which one was an attendant; the other three, patients. About this time, we had several other cases among the male patients, with similar symptoms to typhoid, which failed to show laboratory findings of typhoid fever. The disease, in most of the cases, resembled those described by Wilson as Para-Typhoid. This is the first time any patient has had typhoid fever in over fifteen years. The exact source of infec-

tion has not been determined, but it is generally believed that it was spread by a "so-called" typhoid carried.

The general health of the patients has been exceedingly good, being entirely free from any contagious diseases.

IMPROVEMENTS MADE.

Since our last biennial report, the work of rewiring buildings has been completed. Electric light wiring of all buildings has been renewed and all wires placed in conduits.

Of the appropriations made by the last General Assembly, \$8,950.00 for repaving South Main street, \$6,000.00 for building new coal-house, and \$3,000.00 for retopping the drives about the institution grounds with crushed rock, have not yet been expended.

ORDINARY APPROPRIATIONS NEEDED.

For the ordinary expense fund for the year 1915, \$349,794.00 is asked, \$349,794.00.

For the ordinary expenses of the institution for the second year, \$384,150.00 is asked, \$384,150.00.

The estimate for the first year or 1915 is based upon the care of 1,800 patients at a per capita cost of \$194.33; the second year or 1916, is based on the care of 1,950 patients at a per capita cost of \$197.00.

For ordinary repairs and improvements, we ask for \$25,000.00 per annum, \$50,000.00.

For the improvement of grounds, \$2,000.00 per annum is asked, \$4,000.00.

EXTRAORDINARY REPAIRS AND IMPROVEMENTS.

The institution has about fifty acres of tillable land for farm purposes exclusively and seventy acres for garden purposes. It is felt that more land is greatly needed, not only for economical reasons, but for the purpose of affording suitable employment to a greater number of patients. For this purpose, \$40,000.00 is asked, \$40,000.00.

The institution is greatly in need of a new kitchen. The present kitchen is too small; has low ceilings; is poorly ventilated and poorly arranged. It is proposed to build a one-story detached building. In building this kitchen, it is proposed to use the space now occupied by the kitchen for an industrial department for the making of brooms, shoe-repairing, mattress-making, printing press, and a number of other industries, which can be made use of in the institution to an advantage and which will afford broader fields of employment for patients. The plan also provides for the enlarging of our present amusement hall, which is situated on the second floor above the kitchen. The present amusement hall is entirely too small and if the proposed plan is carried out, it will increase the seating capacity about 250.

The food to the various parts of the main building is now delivered by tunnels, through the basement of the building and from there delivered by dumb waiter. It is proposed to extend these tunnels just across the street to the laundry; and, in this manner, provide a way for the distribution of clean clothes to the various parts of the building, without their being carried by patient-help, out of doors and exposed to all kinds of weather, and in some cases, up four or five flights of stairs. To make these changes, \$40,000.00 is asked, \$40,000.00.

For a long time, we have felt the need of better accommodations for the chronic, helpless and untidy patients, who have accumulated in the institution. Our present accommodations are entirely inadequate to care for this class of patients in the manner they should be cared for. To provide suitable quarters for such patients, it is proposed to build two one-story buildings just west of the present annex buildings; one for males and one for

females, each to accommodate 75 patients. It is believed that each of these buildings can be constructed for the sum of \$15,000.00. For the purpose of building these two buildings, \$30,000.00 is asked, \$30,000.00.

The large number of patients we are caring for, during the past three of four years, has taxed our laundry capacity to the limit. To provide more space and a better arrangement, it is proposed to increase that portion of the laundry, known as the "wash room." For this purpose \$1,500.00 is asked, \$1,500.00.

The store-room, on account of the increased number of patients that we have to care for, is too small, making it impossible to classify and properly arrange the amount of stock that we are compelled to keep on hand. Believing at a small expense, an addition to this building can be made that will greatly improve present conditions. For this purpose \$1,500.00 will be required, \$1,500.00.

For sometime the institution has been in communication with the Jacksonville Railway & Light Company and the railroads entering the city, with the view of establishing arrangements with the Traction Company to deliver coal, and other supplies, purchased, in car load lots to the institution grounds.

While definite plans have not been made to carry out this plan, it is believed that some agreement will be reached in a short time whereby this can be accomplished. The cost of a switch from the lines of the Traction Company to the coal-house of the institution will cost approximately \$3,000.00. This improvement is something that has been greatly needed for a long time and we ask that \$3,000.00 be granted for this purpose, \$3,000.00.

EMPLOYMENT AND AMUSEMENT.

The most difficult thing that an institution of this kind has to do is to provide suitable employment for the different classes of its patients.

During the past biennial period we have made every effort to provide such employment.

In the way of amusements, dances have been provided: One night each week at the main building and one night at the annex building. No entertainment provided by the institution seems to give more pleasure to its patients than these weekly dances.

During the summer months the Sunday afternoon concerts, given by the Jeffries Concert Band have been very much enjoyed.

Chapel services, Sunday afternoons, except during the extreme hot weather, have continued.

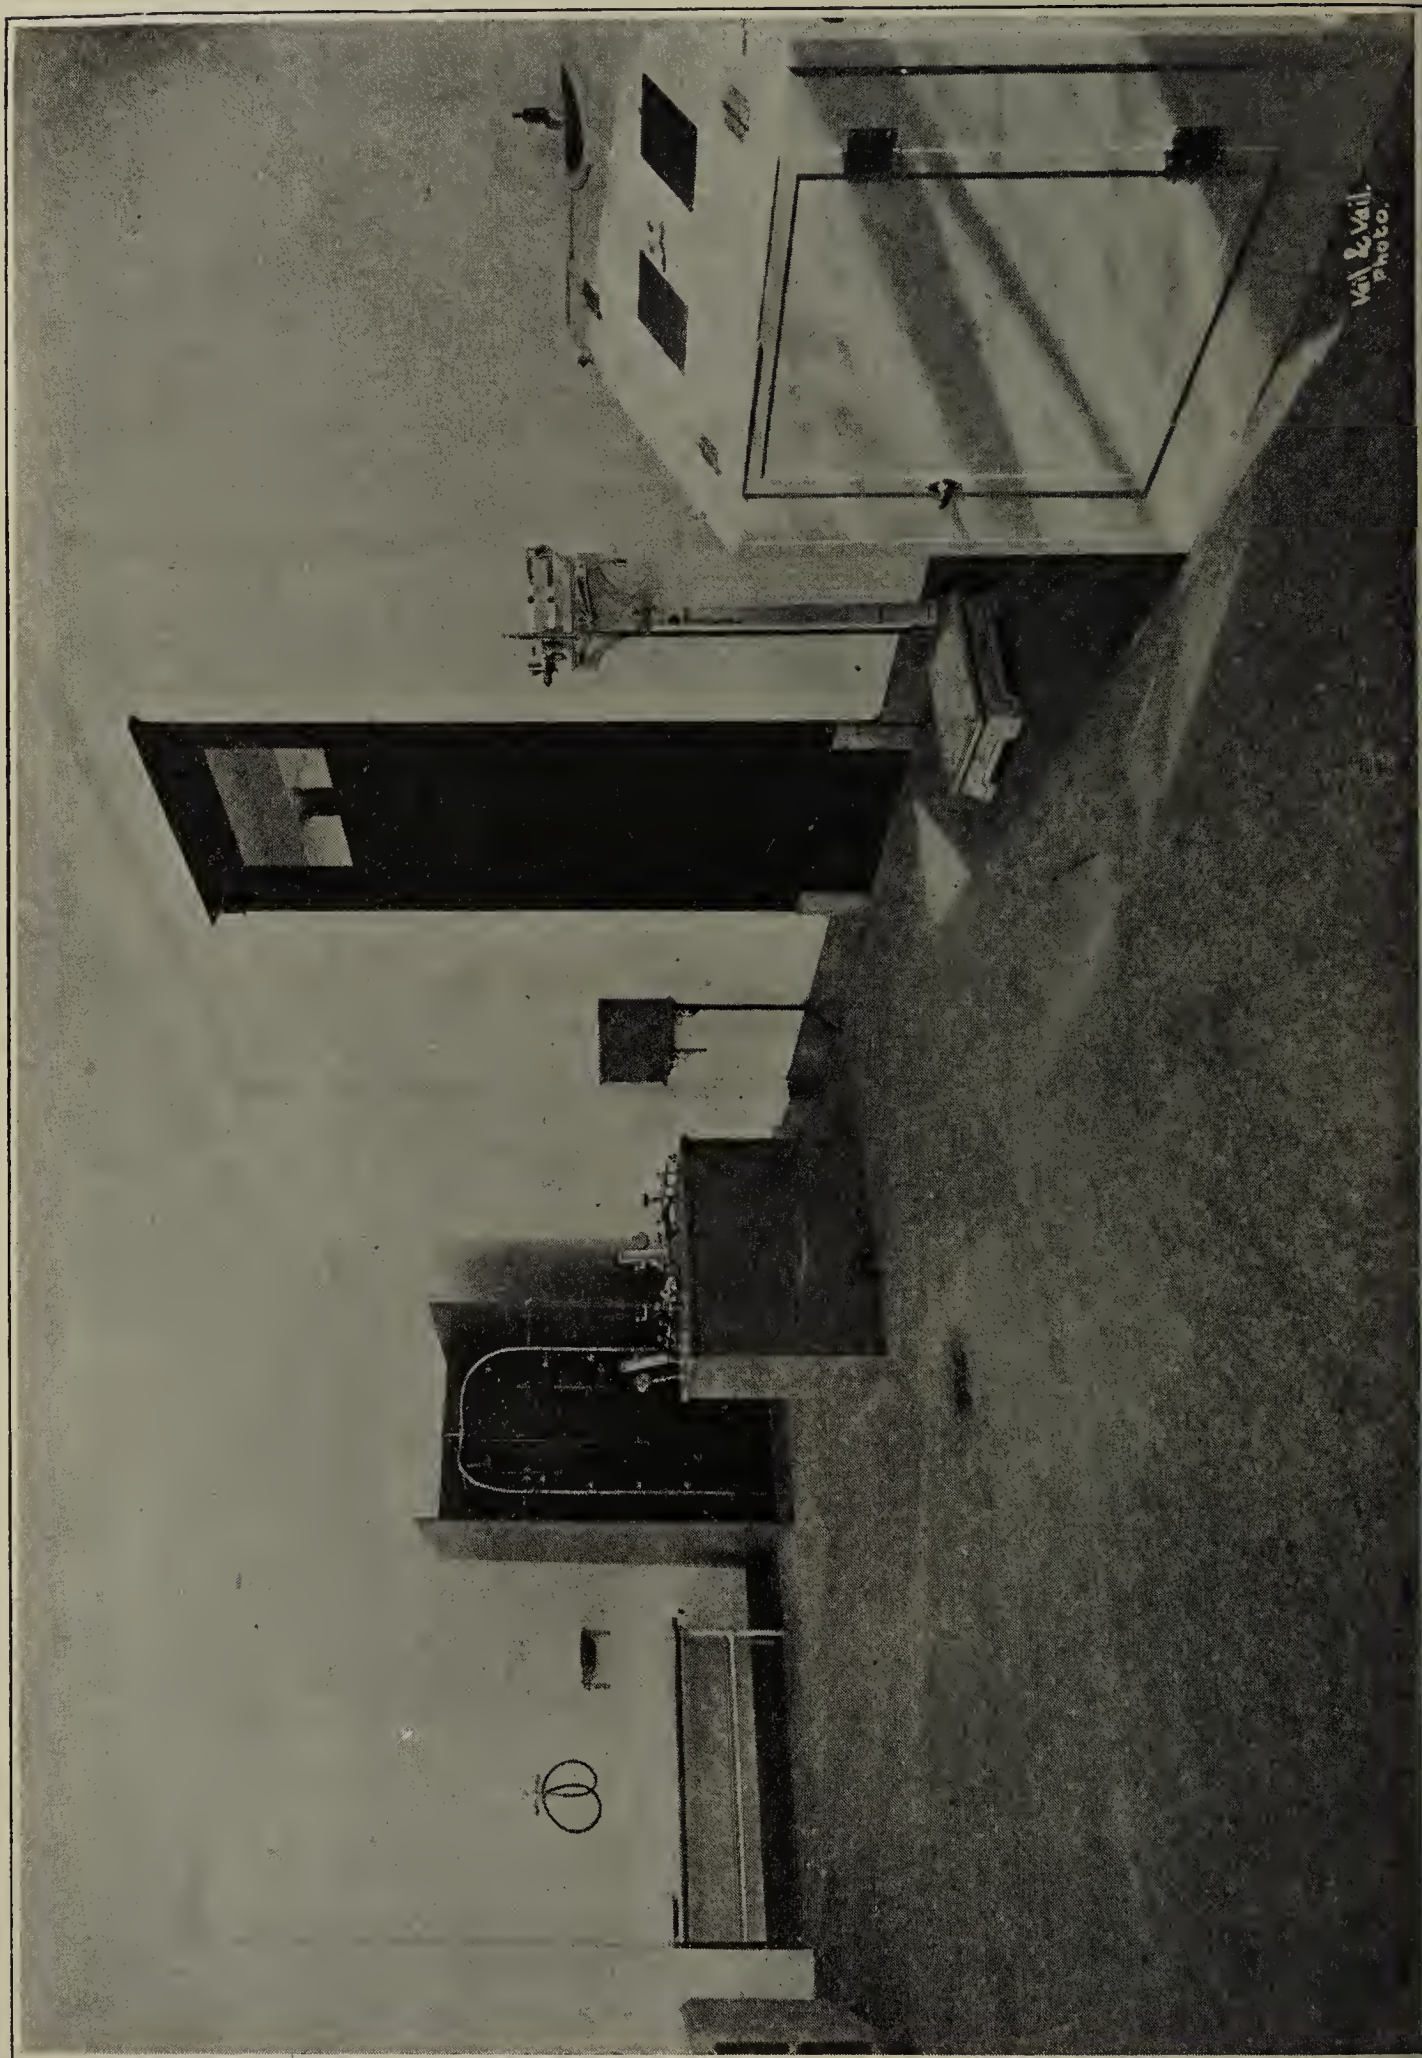

TRAINING SCHOOL.

A Training School for the instruction of those employees whose duties bring them in contact with patients is being continued.

The course followed is that outlined by the Board of Administration. This outline will be found on another page of this report. At present, we have:

35 Pupils in the Preliminary Class,
8 Juniors,
6 Seniors.

Since the beginning of this Training School in 1903, forty-six have graduated from this school. The names and the class in which each graduated, will be found in another portion of this report.

CHANGES IN THE MEDICAL STAFF.

There have been numerous changes in the medical staff during the past two years:

Dr. F. E. Munch, Assistant Physician, resigned his position October 1, 1912, to enter private practice in Chicago.

Dr. R. A. Pratt succeeded Doctor Munch on October 1, 1912, and left the service January 4, 1913, to enter private practice in Chicago.

Gertrude Craig, Chief Nurse, resigned her position November 1, 1912, and was succeeded by Elizabeth Urbach, who reported here November 1, 1912, and left the service June 1, 1914. She was succeeded by Rose Whip on June 29, 1914.

Dr. Charles A. Oaks of Lincoln, Nebraska, succeeded Dr. R. A. Pratt, reporting for duty January 15, 1913, and leaving the service February twelfth of the same year.

Dr. H. F. Litchfield was appointed March 24, 1913, having been transferred to this institution from the Soldiers' and Sailors' Home at Quincy, Illinois. Dr. Litchfield's services here lasted but one day and he resigned his position March 25, 1913.

Dr. E. F. Leonard resigned his position June 1, 1913, and was succeeded by Dr. C. G. Thomas, who reported for duty June 3, 1913. Doctor Thomas resigned July 14, 1913, to enter private practice.

Dr. C. R. Lowe was transferred to this institution from the Kankakee State Hospital, and reported for duty June 11, 1913.

Dr. W. L. Treadway resigned his position July 26, 1913, to accept a position with the Government.

Dr. Thomas G. McLin, was appointed to succeed Doctor Treadway, being transferred from the Peoria State Hospital and reporting for duty August 5, 1913.

Dr. Edward J. Strickler was appointed on August 9, 1913 to succeed Doctor C. G. Thomas, resigned.

Dr. William Babcock, Dentist, reported for duty July 20, 1913, to succeed Doctor Joseph Tormey, resigned.

ACKNOWLEDGEMENTS.

I am again called upon to acknowledge the generosity of publishers, of both daily and weekly papers, in this hospital district, for copies of their publications which they have been sending to the institution. These papers continue to be a source of great pleasure to our patients.

To the officers and all employees of this institution I am indebted for their cordial support and assistance in the management of all departments of the institution.

I am indebted to the members of your Honorable Board, for your assistance and advice and for the courtesies extended to my family and myself.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Administration.

GENTLEMEN: The thirty-fifth biennial report of the managing officer of this institution is herewith respectfully submitted.

The period covered by this report includes two years, beginning October 1, 1914 and ending September 30, 1916.

On October 1, 1914, or the close of the last biennial report, the number of patients present was 1,746. On September 30, 1916, or the close of the period covering this biennial report, the number of patients present was 2,184.

The number of patients admitted during the period covered by this report was 996; the number re-admitted, 639; the number returned while on parole was 147; the total number of admissions for the two years was 1,782.

Of those admitted, 580 were males; 416 were females; of those re-admitted, 321 were males; 318 were females.

The whole number under treatment for the period of this report was 3,381.

Of those discharged from the institution, 247 were discharged as "cured;" 354 as "improved;" 70 as "unimproved;" 459 died; escaped and dropped from the roll, 30; 8 were found to be "not insane."

Of those transferred to other institutions or deported; 1 female transferred to the Peoria State Hospital; 1 male and 3 females transferred to the Elgin State Hospital; 1 male and 1 female transferred to the Kankakee State Hospital; 1 female transferred to the Chicago State Hospital; 12 males transferred to the Alton State Hospital; 1 male transferred to the Lincoln State School and Colony.

HEALTH.

The health of the inmates of this institution has been exceptionally good during this biennial period. We had a few sporadic cases of typhoid in the fall of 1914, with three deaths. Also a few cases of erysipelas during the winter of 1916, which were promptly isolated, with few fatalities.

In March, 1915, by an order issued by the Board of Administration, we were instructed to throw the doors of the institution open for the treatment of drug habitues. From the date of the receipt of this order to the close of this biennial period, we have had 86 males and 110 females admitted to take treatment for the drug habit. Only one of this number died in the institution; the balance were treated satisfactorily and discharged as cured.

IMPROVEMENTS MADE.

Owing to the crowded condition of the Chicago, Kankakee and Elgin State Hospitals, orders were issued by the Board of Administration to the Jacksonville State Hospital, to make arrangements to accommodate 100 patients to be transferred from the Chicago State Hospital; 150, to be transferred from the Kankakee State Hospital and 100, to be transferred from the Elgin State Hospital, to relieve the congestion in these Institutions.

In order to take care of this large number of patients, the building in the rear of the Main Building which had been formerly used by employees, as a club room or loafing place, and the upper floor for storage purposes, was cleaned up, re-painted, furnished and converted into a dormitory. The employees who had occupied quarters in this building were accommodated at the Nurses Home.

The two Annex Centers, North and South, also occupied by physicians and other employees, were converted into quarters for our parole patients. The physicians were made comfortable in quarters prepared for them in the Center of the Main Building, and the other employees were taken care of at the Nurses Home.

A sufficient supply of beds and bedding were purchased and early in March, 1915, we notified the Board of Administration that we were ready to receive the first transfer of 100 patients from the Chicago State Hospital. On March 25, 1915, 100 patients, 25 males and 75 females, were received from this hospital; on August 26, 1915, 150 patients, 75 males and 75 females were received from Kankakee State Hospital, and on October 2, 1915, 100 patients, 25 males and 75 females, were received from the Elgin State Hospital. These patients all arrived in good physical condition after their long journies, and were made to feel at home in their new quarters.

Five new fire escapes were erected, one at the building in the rear of the Main Building, two at the South Annex Center and two at the North Annex Center.

The increase in the population of the institution naturally increased the work at the laundry, which was already crowded to its capacity. Plans were made whereby the large porch on the west side of the main laundry building was enclosed and converted into a sorting room. This gave an additional floor space of 14 feet by 86 feet. The expense incurred was paid from the repair and improvement fund and no extra labor was employed.

Feeling that it would be profitable to feed our slop instead of disposing of it otherwise, as had been the custom in the past, we felt it necessary to purchase some hogs. This necessitated the erection of a hog barn, which was done. This building will comfortably accommodate 150 head of hogs, is of sanitary construction, having concrete floors and concrete feed pens which can be washed and kept clean.

The Forty-eighth General Assembly appropriated \$8,950 for the repaving of South Main Street; \$6,000 for a new coal shed and \$3,000 for retopping the drive about the institution grounds. Upon the recommendations of the city commissioners and the residents of South Main

Street, a tarvia preparation was substituted for brick paving, at a cost to the institution of \$4,263.11. The balance of this fund reverted to the State treasury.

The new coal shed was erected from the \$6,000 appropriation, on the south end of the boiler-room, and is 42 feet wide by 170 feet in length.

The \$3,000 appropriated for retopping the drive about the institution grounds, was used in the purchase of stone from the Joliet Penitentiary. Hauling and the work on the road, excavation, etc., was done by the patients at this institution, under the supervision of a competent road builder, after a grade had been established by the State Highway Commission.

The Forty-ninth General Assembly appropriated \$3,000 to build a switch from the main line of the Jacksonville Railway and Light Company on South Main Street, to the newly erected coal shed, and \$35,000 for a new kitchen and enlarging the Amusement Hall. The work is progressing very nicely on this building, and it is about 25 per cent completed. The switch has been put in and extended to the institution grounds, but the rails have not yet been laid up to and alongside the coal shed, as planned, owing to a disagreement between the C. & A. R. R. and the Street Railway people, and the citizens of South Jacksonville.

In the engineering department, four boiler walls which were in a dilapidated condition, were re-built; the feed water heater was raised and two new vacuum pumps purchased and installed; expansion joints in the breeching that runs to the stack were covered with asbestos.

A Ford Truck which was purchased by the Board of Administration for this institution, has been utilized in carrying food to the Annexes and in doing various odd jobs about the institution. This truck has taken the place of two teams.

A new pasteurizer has been recently purchased and installed by an order of the board. It is giving entire satisfaction and is filling a long-felt want.

Early in the spring of 1916, a pipe line was extended from the water main connecting with the Annex, following the driveway up to the Main Building, for a distance of about 2,700 feet. This was built in order to furnish water for the flower beds which had been put in along the driveway around the grounds.

Feeling that the nurses and attendants of this institution would give better service if they were allowed to eat away from the wards, the large and beautiful dining rooms and kitchen which had been idle since the erection of the Nurses Home, were furnished and equipped, and these employees now eat all their meals at the Nurses Home.

The tin roofs on the Main Building, Dairy Barn, Laundry and numerous other out buildings which had not been painted for a number of years, during the summer of 1916, were given a new coat of paint. All necessary repairs to the roofs and down spouts were made before the painting was done. Wards, 4, and 6 of the South Annex and the interior of the Tubercular Cottage were painted and the woodwork re-varnished. A contract has recently been let and work of painting begun on the

Womans Hospital, Hospitals 1 and 2 East, East Hydro, and wards C-1-E, C-2-E; A-1-W, B-1-W, C-1-W, C-2-W and C-3-W. All these repairs have been made from the Ordinary Repair and Improvement Fund and no special appropriations were made.

Owing to poor light, ventilation and danger in case of fire, the patients occupying the fifth floor wards, east and west, known as A-5 and B-5, were placed in the various wards of the institution where they could be accommodated without over-crowding, and these wards will not be used again for housing patients. We are planning to fit them up for suitable quarters for employees who are rooming away from the institution on account of our inability to take care of them at the Nurses Home.

The building formerly known as the infirmary, where aged and infirm male and female patients were taken care of, has been converted into a hospital for the women.

All of our untidy and destructive female patients have been placed on wards A-1, B-1, and C-2 on the west wing of the Main Building. They have been divided into groups of six, with an attendant in charge of each individual group, who devotes her entire time to specializing, teaching, amusing and caring for these patients. A number of these patients with fewer attendants were destroying from \$40 to \$50 worth of State property per month each, while under this new arrangement, we find that there is very little destruction, the patients are less disturbed and are not so untidy, thereby making a saving for the State and benefiting the patients. Some of these patients are now making dresses on the wards, sewing carpet rags and doing needle work. The possibility of making this improvement was unthought of before.

EIGHT HOUR SYSTEM.

Upon the recommendations of the Board of Administration, the eight hour day was instituted here, July 1, 1915. As the one day off each week and the new system were not really understood, it was a problem that had to be worked out. A larger number of attendants were employed than was found necessary and when an attendant was discharged or resigned, no new attendant was employed, and in that way we decreased the number so employed until we reached the minimum number necessary to carry on the work of the institution successfully. The results obtained have been very gratifying to the patients, employees and the management.

EMPLOYMENT.

Believing strongly in the efficacy of occupational therapy, a strenuous effort has been made by the medical staff to develop this particular line of treatment. The patients themselves often ask that they be given an opportunity to do some work, and usually designate what they would like to do. During the long winter hours of 1915 and 1916 when the weather conditions would not permit the patients to be out of doors, we felt it incumbent upon us to do something to stimulate an interest among the patients, which would prevent, if possible, any further deterioration.

We decided upon the idea of calisthenic exercises. The hours between 10:00 and 11:00 a. m. and 2:00 and 3:00 p. m., every day on every ward, were devoted to these exercises, which consisted of a modified form of the army set-up drill for the males and foot and arm and body movements for the females. We first had classes of instruction for the attendants, who in turn instructed the patients. Instructions as to how to carry out these exercises were written and placed on each ward, giving the number of minutes to be devoted to each exercise. No patient was forced to take part in the exercises but they were coaxed and it was not long until they began to look forward to the hours given over to this form of amusement and improvement. The results obtained were very gratifying; the patients were less destructive, less irritable, slept better and were greatly benefited physically. During the summer months of 1916, these exercises were carried out on the lawn. The patients who took part in the exercises were called our "kindergarten class" and as soon as a patient in this class showed particular interest and entered into the exercises with more marked zest, he was then put in a detail with other patients and this detail was engaged in some useful occupation on the grounds, or he (or she) was put to work in the tailorshop, sewing-room or some other industrial department. If he showed further interest and mental improvement, he was then given a parole of the grounds and after keeping him under observation from one to three months and his conduct was such that we could recommend it, he was presented to the medical staff to determine his fitness for a parole to his home. If, upon examination, the staff found that he was mentally and physically able, his friends and relatives were notified of his condition and advised to come sign his parole papers and take him home.

The detail patients and parole patients are employed in the various industrial departments of this institution, and I wish to speak specifically of the tailor shop, fancy work class, sewing-room and weaving-room.

In the tailor shop for men, we have 35 patients working, and they are manufacturing between 4 and 5 dozen suits of clothes per week besides doing mending, making overalls and other general repair work. With the exception of overcoats, we are now making all the clothing needed by the men patients in this hospital. This department is in charge of a graduate nurse who has received some instruction in the manufacture and cutting of clothing, and under his supervision, this work is carried on efficiently by the patients whose former occupation had been that of tailor.

In the sewing-room, which is in charge of one attendant, we work between 95 and 100 lady patients. In this department they manufacture practically everything that is needed and worn by the female patients of the institution. We expect to enlarge this department by putting in four new power machines.

In the fancy work class, we have from 175 to 200 lady patients employed, piecing and quilting quilts, weaving baskets and doing various forms of needle craft.

In the weaving-rooms we have three looms which are operated by 30 patients, and the rags, after having been washed, are cut up, sewed and made into rugs and carpets, for use in the institution.

The head farmer has three paid employees in his department and the balance of the work is done by 25 parole patients.

Our dairy department is in charge of one employee assisted by 25 parole patients, and consists of about 100 milk cows.

The garden is in charge of one employee and 25 parole patients.

We have developed the occupational idea until we now have between 1,300 and 1,400 patients who work on details, which does not include the ward workers. The products of the different industrial departments are used in the institution exclusively.

AMUSEMENTS. -

Believing that the patients were greatly benefited by amusements, we have accordingly endeavored to give them a varied program. Two days each week are almost entirely devoted to picture shows, beginning at 2:00 o'clock in the afternoon and continuing until 9:00 o'clock at night. All patients who are not in the hospital wards and who care to attend, are given an opportunity to see them. Two dances per week are given, one in the Amusement Hall at the Main Building on Monday evenings and one in the Amusement Hall at the Annex on Thursday evenings. Frequently in addition to the above, we have vaudeville acts or performances.

We have recently purchased a player piano and six new victrolas, with a supply of records, which afford the patients a great deal of pleasure.

RELIGIOUS SERVICES.

Services for both Catholics and Protestants are held at the institution, every Sunday, the Catholics holding their services in the morning and the Protestants in the afternoon. Arrangements have been made whereby we will be able in the future, to secure the services of a Jewish Rabbi to look after the interests of the patients of Jewish faith.

Arrangements have been made whereby the minister who has charge of the services here for the month, also officiates at the funerals of patients who die in the institution and are buried in Diamond Grove Cemetery, Jacksonville.

CHANGES IN THE MEDICAL STAFF.

Dr. Minerva B. Pontius, Assistant Physician, was transferred to the Soldiers' Widows' Home at Wilmington, Ill., January 19, 1915.

Dr. Wilma H. Jacobs, Physician, was transferred here from the Soldiers' Widows' Home on January 22, 1915, to succeed Dr. Pontius.

March 1, 1915, Dr. H. B. Carriel, Superintendent, resigned, and Dr. E. L. Hill of Red Bud, Ill., was appointed in his place.

Dr. Wilma H. Jacobs was transferred to the Chicago State Hospital, August 14, 1915, and her place was filled by Dr. Alice M. Smith.

Dr. F. A. Stubblefield, Assistant Physician, was transferred to the Alton State Hospital, August 23, 1915.

Dr. Walter A. Ford was appointed Physician, August 24, 1915.

Dr. Anny Marie Peterson, Interne, was transferred to this institution from the Kankakee State Hospital, November 15, 1915.

Dr. Alice M. Smith, Physician, was transferred to the Watertown State Hospital on November 16, 1915.

On November 21, 1916, Dr. Walter A. Ford was transferred to a position as Pathologist at the Psychopathic Institute, and Dr. L. G. Wright was appointed on November 24, to succeed him.

Dr. F. B. Pearce was appointed as Interne on February 2, 1916, but left the institution on February 8, to enter private practice at Eldorado, Ill.

March 1, 1916, Dr. C. C. Atherton, Assistant Superintendent of the Watertown State Hospital, was transferred here and Dr. Edward A. Foley, Assistant Superintendent here, was sent to Watertown to fill the position vacated by Dr. Atherton.

March 31, 1916, Dr. Chas. R. Lowe was transferred to the Lincoln State School and Colony.

On May 2, 1916, Dr. Wm. Babcock, Dentist, resigned his position to enter private practice near Chicago. Dr. Thomas J. Denny was appointed July 1, to fill his place, but resigned on July 6. On July 16, 1916, Dr. Auston C. Kingsley of Jacksonville was appointed Visiting Dentist.

August 2, 1916, Dr. L. G. Wright resigned his position as Physician, on account of ill health.

Dr. Samuel D. Rosenthal was appointed August 4, 1916, to succeed Dr. Wright.

Dr. Bert Smith, Assistant Physician, was appointed August 5, 1916.

THE TRAINING SCHOOL.

At the conclusion of this biennial period, there are on the nursing force of this institution, one chief nurse, four supervising nurses, two male and two female; one graduate nurse acting as relief supervisor; ten graduate nurses and two hundred and twelve attendants.

During the year of 1914, seven senior nurses enrolled, six of whom finished the course and graduated in 1915. The seventh was discharged soon after entering the class, for insubordination. The same year, 1914, nineteen junior nurses enrolled, but only seven finished the junior year. Some complained that the course was too hard, several resigned and several were discharged. Of the remaining seven, only one failed to pass the civil service examination. This same year, twenty-two junior nurses enrolled, but by December only ten remained of the class. At the present time there are only four of these pupils left to graduate. Two of the ten were compelled to give up study on account of poor health and the other four left the service. During September, 1916, forty-two junior pupils enrolled. At the present time there are thirty-seven in the class.

During the years of 1914 and 1915, a preliminary course of three months was given to attendants entering the service, but this was discontinued during the months of June, July and August. During 1916, this course was given with the addition of instructions in calisthenics and

was continued through the summer months. At present we have sixty-eight attendants in this class.

Since the beginning of the Training School in 1903, fifty-eight have graduated from this school.

Essie Emerson.

ORDINARY APPROPRIATIONS NEEDED.

For ordinary expenses for 1917, basing our per capita at \$160, and the number of inmates at 2,300, \$368,000 is asked, \$368,000.

For ordinary repairs and improvements for 1917, \$30,000 is asked, \$30,000.

For ordinary care and improvement of grounds, \$2,000 is asked, \$2,000.

For ordinary expenses for 1918, basing our per capita at \$160 and the number of inmates at 2,400, \$384,000 is asked, \$384,000.

For ordinary repairs and improvements for 1918, \$30,000 is asked, \$30,000.

For ordinary care and improvement of grounds for 1918, \$2,000 is asked, \$2,000.

SPECIAL APPROPRIATIONS.

As we are increasing our dairy herd so that it will not be necessary to purchase milk on the outside, our dairy barn is not large enough to take care of this anticipated increase, and \$10,000 is asked for enlarging and repairing our dairy barn, \$10,000.

Feeling the necessity of isolating all tubercular patients and owing to the increased number of tubercular patients whom we are unable to accommodate in our tubercular cottage, we ask that \$10,000 be appropriated for the erection of a tubercular cottage for males, \$10,000.

The \$3,000 appropriated by the Forty-eighth General Assembly for retopping the drive in the institution grounds, was not sufficient for this work, therefore we are asking for \$3,000 to complete this driveway, \$3,000.

This institution is sadly in need of suitable quarters to take care of the old men and old ladies, therefore we are asking for \$50,000 for a cottage to take care of 100 old ladies, and \$50,000 for a cottage for 100 old men, total, \$100,000.

This institution has developed the industrial departments to such an extent that we now have no suitable quarters for these growing industries. As mentioned above, we find that the patients are being greatly benefited by occupation, as well as making a great saving for the State. The quarters now occupied by the tailor department, where all the clothing for the male patients is made, is an old frame building which was formerly used as a bowling alley, with poor ventilation and light. The room used as a sewing-room, where all the clothing worn by the female patients is made, is in the second story of the laundry building, is poorly lighted and ventilated and highly unfit for the purpose used. Therefore, we ask that \$20,000 be appropriated for an Industrial Building, \$20,000.

The increase in the population of this institution has made it imperative that we enlarge the garden and increase our dairy herd. We find that the amount of land owned by the institution, is inadequate. There are eighty acres of excellent land abutting the State's property in Jacksonville, which can be purchased for \$250 per acre, and I ask that \$20,000 be appropriated for the purchase of this eighty acre farm, \$20,000.

The cooking for this institution is done in five kitchens. As soon as the new kitchen is completed, it will be necessary to extend the tunnels from the Main Building to the Annexes and to the Nurses Home, and for the extending of this tunnel, we ask that \$5,000 be appropriated, \$5,000.

IN CONCLUSION.

In conclusion I wish to extend my appreciation and gratitude to each member of the board, for his every ready and willing advice, cooperation and encouragement, which has been of inestimable value to me.

Respectfully submitted,

E. L. HILL, *Managing Officer.*

XV. Not insane.....	2	2
Total.....	112	135	247

TABLE NO. 16—DEATHS AND CAUSES.

Cause of death.	Male.	Female.	Total.
I. General diseases—			
Pulmonary tuberculosis.....	17	15	32
Carcinoma of breast.....	4	4
Carcinoma of stomach.....	1	1
Erysipelas.....	2	9	11
Gangrene of lungs.....	1	1
Senile gangrene.....	1	1
General peritonitis.....	1	1
Biliary calculi.....	1	1

TABLE NO. 16—Concluded.

Cause of death.	Male.	Female.	Total.
I. General diseases—Concluded.			
Pernicious anemia.....	2	2
Cirrhosis of liver.....	2	2
Tubercular peritonitis.....	1	1
Gangrene of foot.....	1	1
Typhoid fever.....	3	3
Acute infection of arm.....	1	1
II. Diseases of the nervous system and organs of special sense—			
General paralysis of the insane.....	78	11	89
Senile dementia.....	47	38	85
Epileptic state.....	14	7	21
Manic depressive.....	5	3	8
Cerebral hemorrhage.....	3	3	6
Huntington's chorea.....	2	2	4
Infective exhaustive psychosis.....	7	2	9
Dementia praecox.....	13	5	18
Korssakow psychosis.....	1	1
Epileptic convulsion (coroner's case).....	1	1	2
Hemorrhage into right ventricle of brain.....	1	1
Cerebral syphilis.....	2	2
Paretic convulsion.....	1	1
Chronic morphinism.....	1	1
Exhaustion, due to manical state (coroner's case).....	1	1
Infantile cerebral paralysis.....	1	1
Suffocation, paretic convulsion (coroner's case).....	1	1
Organic brain disease.....	2	1	3
Status epilepticus.....	1	4	5
Senile dementia (fracture of hip).....	1	1
Exhaustion, due to convulsion following operation.....	1	1
Tabo-paresis.....	1	1
Toxemia due to infection of arm.....	1	1
Toxemia due to infection of leg.....	1	1
Exhaustion, course of unclassified psychosis.....	1	1	2
Exhaustion, course of imbecility.....	1	1
Delirium tremens.....	1	1
Heat exhaustion.....	2	1	3
Pellagra.....	1	1
III. Disease of the circulatory system—			
Myocarditis.....	6	1	7
Arterio sclerosis.....	19	23	42
Mitral insufficiency.....	8	4	12
Valvular disease of the heart.....	2	5	7
Chronic endocarditis.....	2	2
Tricuspid insufficiency.....	1	1
Pericarditis.....	1	1
Exhaustion, amyotrophic lateral sclerosis.....	1	1
IV. Diseases of the respiratory system—			
Lobar pneumonia.....	6	14	20
Hypostatic pneumonia.....	1	1
Bronchial asthma.....	1	1
Pulmonary oedema.....	1	1	2
Acute oedema of lungs.....	1	1
Broncho pneumonia.....	2	2
Pulmonary abscess.....	1	1
V. Diseases of the digestive system—			
Acute enteritis.....	1	1	2
Chronic enteritis.....	1	1
Acute gastro-enteritis.....	2	2
Acute gastric dilatation.....	1	1
Acute entero-colitis.....	3	3
VI. Non-venereal diseases of the genito-urinary system and anexa—			
Acute parenchymatous nephritis.....	1	1	2
Chronic institial nephritis.....	1	1
Chronic parenchymatous nephritis.....	1	1
VII. Affections produced by external causes—			
Compound fracture of left leg, simple fracture of right leg...	1	1
Injury from blow on head (coroner's case).....	1	1
Strangulation by hanging (coroner's case).....	2	2
Fracture of skull from blow on head. (Coroner's case).....	1	1
Fracture of femur.....	1	1
Suicide, hanging by neck (coroner's case).....	1	1	2
General debility.....	1	1
Shock, septic infection from accidental crushing of foot and leg (coroner's case).....	1	1
Prostatectomy (post operative shock).....	1	1
Total.....	275	184	459
